Mission Statement

Through well-trained and highly motivated manpower and superior technology in the production of protective coatings and related products, it is our mission:

To provide excellent customer service and high-level satisfaction to the needs of all our stakeholders... thereby creating an environment where we continue to be the preferred business partner, the outstanding corporate citizen and the preferred employer.

Company Profile

Berger Paints Trinidad Limited has played a major role in Trinidad's manufacturing arena since it started operations in the mid 1960's. Today it is a subsidiary of ANSA Coatings International Limited and a member of the ANSA McAL Group.

Berger became a household name in Trinidad from inception, and has over time established itself as a formidable entity. Known for its high quality products and innovation, Berger Paints Trinidad Limited has today become a lifestyle brand. Like changing trends in style and fashion, and trends which change over time and season, so it is with colour, décor and interior design.

Berger Paints Trinidad is the only manufacturer of large-scale industrial paint products in the English-speaking Caribbean and in addition to servicing over 190 local retailers, has been serving the export markets of Guyana and Suriname for well over 10 years.

Chairman's **Review**

Best wishes to Our Valued Shareholders.

It is my pleasure to be appointed Chairman of the Caribbean's Premium Paint Brand. On behalf of the Management and Staff of Berger Paints Trinidad Limited, we would like to thank our outgoing Chairman, Mr. John P. Andrews for his many years of dedication and support to the company.

We have now completed seventeen months of operations under the ANSA McAL Group, and during this time, much has been achieved. Emphasis was placed on rebuilding the foundations for sustainable profitability. In this regard, we have focused on further building the Brand by opening more distribution channels and investing in the upgrade and maintenance of equipment, as well as, investing in raw materials to ensure full product availability.

Further, work was done to improve the quality of our already high performing formulations and improve the margins by reviewing costs in logistics and production. Berger also reduced the delivery time to customers to further improve service levels to ensure an overall better experience.

Berger also re-introduced the Berger Royale line, our most premium interior paint and will relaunch in 2019 Berger Weatherproof Plus, our most premium exterior paint. Both of these high end, high performing products under warranty and are superior to international competition.

To support the above efforts, Berger implemented a consumer direct strategy, in which the customer is focused on the retail sales point nearest to them in order to meet their protective decorative needs. This 'push' strategy supported the retailer by raising the confidence level in the Brand, in so doing, validated the investment being made in stocking the various products.

In February 2018, ANSA Coatings International Limited issued a notice of compulsory acquisition pursuant to the Companies Act and the Securities Act to acquire the remaining shares of Berger Paints Trinidad Limited. Upon completion of the exercise in May 2018 ANSA Coatings International Limited and its affiliate Sissons Paints Trinidad Limited were the sole shareholders of the company. As a result of the change in shareholding, the Company has sought to be delisted from the Trinidad and Tobago Stock Exchange.

ECONOMIC OVERVIEW

The International Monetary Fund Projects 0.2% GDP Growth in Trinidad and Tobago for 2019. While the World Bank estimates .5% Growth.

As mainly a natural gas-based economy, Trinidad and Tobago has seen growth in the food processing sector, while other non-oil sectors

Chairman's Review

remain weak. We expect to see growth in the production of natural gas as the Angelin Project comes on line. As further natural gas projects along with the expected Government Capital Programme occur in 2019, it is expected that these will buttress economic activity.

The economy continues to be affected by the availability of US currency and this continues to affect the business community.

COMPANY PERFORMANCE

As a result of the change in Berger Paints Trinidad Limited Financial year-end, our reporting period compares nine (9) Months, April 1st to December 31st 2017 to twelve (12) months, January 1st to December 31st 2018. This comparison shows a positive growth in revenue of 32%.

The result of the operating period for 2018 is a loss of Four million, nine hundred and eighty two thousand dollars (\$4,982M). The main contributing factors to this result were the updates in the contributions to the Pension Fund, Back Pay and Retro-active Salaries and one off management payments, as well as, IFRS 9 adjustments for Accounts Receivable Provisions.

Due to the strength of the ANSA McAL Group, the company was able to meet supplier commitments and ensure that raw materials were available to meet sales teams requirements in order to achieve a growth of 5% YOY. Berger Paints achieved 96% of budget in volume and 90% of budget in value for 2018.

OUTLOOK

The support and resources provided by the ANSA McAL Group has already provided substantial support and efficiency to Berger Paints Trinidad Limited, in the areas of raw material purchasing, Human Resource and Industrial Relations and this year we will be focusing on alignment of our operations with the ANSA McAL Group to continue to improve efficiencies.

I would like to thank, my fellow directors, our dedicated employees and our valuable customers for their continued support.

Best Regards

Adam N. Sabga
Chairman

For Lasting Beauty and Protection

Management Discussion & Analysis

The Management of Berger Paints Trinidad Limited has worked with the Auditors, Ernst & Young Services Limited, to present the Financial Statements that follow. Management is responsible for the integrity and objectivity of the information contained in the Discussion. The Financial Statements have been approved by the Board of Directors.

Unless otherwise indicated, all amounts are expressed in Trinidad & Tobago Dollars and have been primarily derived from our Financial Statements.

This is prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Boards (IASB).

CORPORATE OVERVIEW

ANSA Coatings International Limited (ACIL), a subsidiary of the ANSA McAL Group held 94% of the shares of Berger Paints Trinidad Limited following the mandatory takeover in November 2017.

On February 20, 2018 ACIL issued a Notice of Compulsory Acquisition to acquire the remaining 6% of the shares as a result of this exercise, ANSA Coatings International Limited now holds 98.93% of the shares in Berger Paints Trinidad Limited with Sissons Paints Trinidad Limited (its affiliate) holding 1.17%. The Company in accordance with the Companies Act, will ensure that all shareholders who have not responded to the Notice of Compulsory Acquisition are paid for their shares subject to presentation the production of a share certificate or other evidence of ownership.

Trading is suspended as a result of the notice of compulsory acquisition and the last trading share price was \$4.25.

In November 2018, the shares held by Lewis Berger (Overseas Holdings) Limited was transferred to ANSA Coatings International Limited as a distribution in specie. The Company has sought to delist its shares from the Official List of the Trinidad and Tobago Stock Exchange.

RISK MANAGEMENT

The major risks that affected Berger Paints Trinidad Limited:

Foreign Currency Risk

Currency risk is the risk that the value of a financial instrument will fluctuate due to changes in the foreign exchange rate. Throughout the year there has been a severe shortage in foreign currencies, the business community has expressed their sentiments that the TT Dollar is overvalued to the US Dollar and would like to see the exchange rate adjusted according to the demand.

Credit Risk

This is the potential for loss to the company arising out of non-payment by a customer.

Management Discussion & Analysis

Dealers are withholding payments as they themselves have outstanding due from the Government, others are experiencing lower sales and it is becoming difficult for them to stay afloat. Steps have been taken to mitigate this risk by full and regular analysis of customer accounts by Management.

Economic Risk

The turbulent global trade environment during 2018 resulted in a loss of global growth momentum in 2018 compared to 2017. The muted expansion in economic activity in 2018 was partly reflective of escalating trade tensions between the US and key trading partners, the uncertainty surrounding the renegotiations of the North American Free Trade Agreement (NAFTA) and the prolonged unpredictability related to the UK's impending exit from the EU.

While Trinidad and Tobago's main export commodities continue to be energy or energy-related products, opportunities for the promotion of non-energy exports also exist. Following exports of mineral fuels and chemical products, manufactured commodities represent the third largest category of exports from Trinidad and Tobago in 2018. On the non-energy side the pickup in construction observed in the second quarter seemed to have reversed in the third quarter, but distribution and banking grew moderately, while manufacturing remained fairly stable.

Though improved energy sector performance increased foreign exchange inflows, the market for foreign exchange remained tight throughout 2018. The weighted average TTD/USD selling rate depreciated slightly from TT\$6.7817/ US\$1 in December 2017 to TT\$6.7861/US\$1 in December 2018.

FINANCIAL PERFORMANCE OVERVIEW

Berger Paints Trinidad Limited financial statements for the year 2018 fully align with the ANSA McAL Group reporting lines. These results are being compared to the nine month reporting period April to December 2017.

The company reported a Net loss after tax of \$4,982,000 as at December 31, 2018 compared to a loss of \$300,000 over the nine month period ended December 31, 2017. The Other Comprehensive disclosure reflects the changes in the defined benefit pension plans in operation. The net result is a loss of \$5,003,000 for the current period and a loss of \$1,760,000 for the prior nine month period.

REVENUE

Net Sales or revenue for the period ended December 31, 2018 was \$ 47,656,000 compared to \$36,141,000 over the nine month period last year, a 32% increase in revenue. Exports contributed to 6% of total sales.

The year 2018 reflected an improvement in the revenues which had been trending downwards over the last few years. The Berger brand is powerful and we expect a continuation of the trend over the next three years.

Management **Discussion & Analysis**

EXPENSES

The shortage of US dollars on the market hindered the smooth ordering process and some of our major suppliers needed on time payments in line with the trading terms. Overall, cash expenses were well managed or on par with the prior period in most areas.

CURRENT **ASSETS AND LIABILITIES**

Our current assets overall balance have decreased over last year on account of debtors and cash however; this was in part offset by the increase in inventory levels. Management has continued to press hard on collections and other past due accounts, it should be noted that the reduction in the cash balance is mainly due purchase of USD, to settle the USD overdraft balance. The short supply of hard currency has resulted in higher import costs which have impacted profit margins.

The current liabilities are on par with the prior period except for related parties' payables, resulting from the realignment of Berger's foreign purchases being channeled through ANSA US.

STRATEGIC **DIRECTION AND OUTLOOK**

The economic condition in 2018 was very challenging and we expect this to continue. The year 2018 for Berger saw its structure, systems and strategy being aligned to the ANSA McAL Group and this process will continue into 2019. We will continue to ensure that we provide quality products and excellent services to our consumers and ensure that they get value for their money.

The company remains mindful of its foremost commitment to serve the needs and expectations of its shareholders and customers and will continue to deploy its resources in deliberate pursuit of these objectives. We take this opportunity to thank the Management and staff for their dedication and loyalty which have served to maintain our leadership position in the Industry, and we count on their continued support as we confront the challenges posed by the difficult economic conditions.

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF BERGER PAINTS TRINIDAD LIMITED

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of Berger Paints Trinidad Limited ("the Company"), which comprise the statement of financial position as at 31 December 2018, and the statements of comprehensive income, changes in equity and cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Company as at 31 December 2018 and its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards ("IFRSs").

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing ("ISAs"). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants ("IESBA Code"), and we have fulfilled our other ethical responsibilities in accordance with the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current year. We have determined that there are no key audit matters to communicate in our report.

Other Matter

The financial statements of Berger Paints Trinidad Limited for the year ended 31 December 2017, were audited by another auditor who expressed an unmodified opinion on the audit report dated 8 March 2018.

**INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF
BERGER PAINTS TRINIDAD LIMITED**

**Report on the Audit of the Financial Statements
(Continued)**

Responsibilities of Management and the Board of Directors for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRSs, and for such internal control as management determines is necessary to enable the preparation of the financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors is responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

**INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF
BERGER PAINTS TRINIDAD LIMITED**

**Report on the Audit of the Financial Statements
(Continued)**

**Auditor's Responsibilities for the Audit of the Financial Statements
(Continued)**

- Conclude on the appropriateness of management's use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the Board of Directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the Board of Directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with the Board of Directors, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefit of such communication.

The Executive in charge of the audit resulting in this independent auditor's report is Indira Regobert.

BERGER PAINTS TRINIDAD LIMITED

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2018 (Expressed in thousands of Trinidad and Tobago dollars)

1. Incorporation and principal activity

Berger Paints Trinidad Limited ("the Company") is incorporated and domiciled in the Republic of Trinidad and Tobago. The Company is engaged in the manufacture and distribution of paints and allied products. The Company has a primary listing on the Trinidad and Tobago Stock Exchange. The Company was purchased by Ansa Coatings International Limited, a subsidiary of the Ansa McAL Group on 24 July 2017. The ultimate parent company is Ansa McAL Limited.

Berger Paints Trinidad Limited year end has changed from April to March to January to December to align itself with the parent company's reporting period. For the year ended 31 December 2017 a nine-month period was reported. A twelve-month period is reported for the year ended 31 December 2018. The Company's registered office is located at 11 Concessions Road, Sea Lots, Port of Spain, Trinidad and Tobago.

2. Significant Accounting Policies

The principal accounting policies applied in the preparation of these financial statements are set out below:

i. Basis of preparation

These financial statements are expressed in thousands of Trinidad and Tobago dollars (except when otherwise indicated) and have been prepared on a historical cost basis except for leasehold properties which are measured at fair value.

Statement of compliance

The Company's statutory financial statements are prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB").

Presentation of the financial statements

Financial assets and financial liabilities are offset, and the net amount is reported in the statement of financial position if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously. Income and expenses are not offset in the statement of comprehensive income unless required or permitted by any accounting standard or interpretation, and as specifically disclosed in the accounting policies of the Company.

BERGER PAINTS TRINIDAD LIMITED

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2018
(Expressed in thousands of Trinidad and Tobago dollars)
(Continued)**

2. Significant Accounting Policies (continued)

ii. Changes in accounting policies and disclosures

New and amended standards and interpretations

The Company applied IFRS 15 and phase II of IFRS 9 for the first time. The nature and effect of the changes as a result of adoption of these new accounting standards are described below.

Several other amendments and interpretations apply for the first time in 2018, but do not have an impact on the financial statements of the Company. These are described in more detail below. The Company has not early adopted any standards, interpretations or amendments that have been issued but are not yet effective.

IFRS 15, 'Revenue from Contracts with Customers'

IFRS 15 supersedes IAS 11, 'Construction Contracts', IAS 18, 'Revenue' and related Interpretations and it applies, with limited exceptions, to all revenue arising from contracts with its customers. IFRS 15 establishes a five-step model to account for revenue arising from contracts with customers and requires that revenue be recognized at an amount that reflects the consideration to which an entity expects to be entitled in exchange for transferring goods or services to a customer.

IFRS 15 requires entities to exercise judgement, taking into consideration all of the relevant facts and circumstances when applying each step of the model to contracts with their customers. The standard also specifies the accounting for the incremental costs of obtaining a contract and the costs directly related to fulfilling a contract. In addition, the standard requires extensive disclosures.

The Company adopted IFRS 15 using the modified retrospective method of adoption with the date of initial application of 1 January 2018. Under this method, the standard can be applied either to all contracts at the date of initial application or only to contracts that are not completed at this date. The Company elected to apply the standard only to contracts not completed at this date. The Company also aggregated the effect of all of the modifications that occurred in contracts that were modified before 1 January 2018 when identifying the satisfied and unsatisfied performance obligations, determining the transaction price, and allocating the transaction price to the satisfied and unsatisfied performance obligations.

ii. Changes in accounting policies and disclosures (continued)

New and amended standards and interpretations (continued)

IFRS 15, 'Revenue from Contracts with Customers' (continued)

Sale of goods with variable consideration

Some contracts for the sale of goods provide customers with a right of return and volume rebates. Before adopting IFRS 15, the Company recognized revenue from the sale of goods measured at the fair value of the consideration received or receivable, net of returns and volume rebates. If revenue could not be reliably measured, the Company deferred recognition of revenue until the uncertainty was resolved. Under IFRS 15, rights of return and volume rebates give rise to variable consideration.

Rights of return

Before the adoption of IFRS 15, returns were not anticipated and therefore were recognized as reduction to revenue in the period that the return occurred, with a corresponding adjustment to Cost of sales. Under IFRS 15, the consideration received from the customer is variable because the contract allows the customer to return the products. The Company estimates expected returns using the expected value method under IFRS 15. For goods expected to be returned, the Company presented a refund liability and an asset for the right to recover products from a customer separately in the statement of financial position. After review we determined that the value of credit notes is immaterial and there is no need to make any adjustments.

The adoption of IFRS 15 did not have an impact on Company's financial statements.

IFRS 9, 'Financial Instruments'

IFRS 9, 'Financial Instruments' replaces IAS 39, 'Financial Instruments: Recognition and Measurement' for annual periods beginning on or after 1 January 2018, bringing together all three aspects of the accounting for financial instruments: classification and measurement; impairment; and hedge accounting.

Phase 1 – Classification and measurement of financial instruments, was early adopted by the Company in its prior period financial statements. The exemption given in the transitional provision for early application was applied and hence the Company did not restate the comparative information in the year of application.

Phase II - Impairment, of IFRS 9 was applied prospectively, with an initial application date of 1 January 2018. The Company has not restated the comparative information, which continues to be reported under the relevant aspects of IAS 39. Differences arising from the adoption of IFRS 9 have been recognized directly in retained earnings and other components of equity.

The adoption of phase II has fundamentally changed the Company's accounting for financial asset impairments by replacing IAS 39's Incurred loss approach with a forward-looking expected credit loss (ECL) approach. Details of the Company's impairment method are disclosed in Note 2 (xvi).

Upon adoption of IFRS 9 the Company recognized additional impairment on the Company's trade and other receivables of \$277 thousand which resulted in a decrease in retained earnings of \$277 thousand as at 1 January 2018.

Phase III - Hedge accounting, of IFRS 9 had no impact on the Company's financial statements.

2. Significant Accounting Policies (continued)

ii. Changes in accounting policies and disclosures (continued)

New and amended standards and interpretations (continued)

IFRS 9, 'Financial Instruments' (continued)

The qualitative impact of adopting IFRS 9 as at 1 January 2018 is disclosed below. The reconciliation between the carrying amounts as originally stated as at 31 December 2017 and the adoption of IFRS 9 as at 1 January 2018 is as follows:

	As previously reported	Re- measurement	As adjusted per IFRS 9
Assets			
Trade and other receivables	16,707	(277)	16,430
Equity			
Retained earnings	17,361	(277)	17,084

The following table reconciles the aggregate opening financial asset provisions under IAS 39 to the ECL allowances under IFRS 9:

	Impairment allowance per IAS 39 at 31 December 2017	Re- measurement	ECL per IFRS 9 at 1 January 2018
Trade and other receivables	3,627	277	3,904

IFRIC 22 - Foreign Currency Transactions and Advance Considerations

The Interpretation clarifies that, in determining the spot exchange rate to use on initial recognition of the related asset, expense or income (or part of it) on the derecognition of a non-monetary asset or non-monetary liability relating to advance consideration, the date of the transaction is the date on which an entity initially recognizes the non-monetary asset or non-monetary liability arising from the advance consideration. If there are multiple payments or receipts in advance, then the entity must determine the date of the transactions for each payment or receipt of advance consideration. This Interpretation does not have any impact on the Company's financial statements.

2. Significant Accounting Policies (continued)

ii. Changes in accounting policies and disclosures (continued)

New and amended standards and interpretations (continued)

Amendments to IAS 40 'Investment property' - Transfers of Investment Property

The amendments clarify when an entity should transfer property, including property under construction or development into, or out of investment property. The amendments state that a change in use occurs when the property meets, or ceases to meet, the definition of investment property and there is evidence of the change in use. A mere change in management's intentions for the use of a property does not provide evidence of a change in use. These amendments do not have any impact on the Company's financial statements.

Amendments to IFRS 2 'Share-based payments' - Classification and Measurement of Share-based Payment Transactions

The IASB issued amendments to IFRS 2, 'Share-based Payment' that address three main areas: the effects of vesting conditions on the measurement of a cash-settled share-based payment transaction; the classification of a share-based payment transaction with net settlement features for withholding tax obligations; and accounting where a modification to the terms and conditions of a share-based payment transaction changes its classification from cash settled to equity settled. On adoption, entities are required to apply the amendments without restating prior periods, but retrospective application is permitted if elected for all three amendments and other criteria are met. These amendments do not have any impact on the Company's financial statements.

Amendments to IFRS 4 'Insurance contracts' - Applying IFRS 9 Financial Instruments with IFRS 4 Insurance Contracts

The amendments address concerns arising from implementing the new financial instruments standard, IFRS 9, before implementing IFRS 17 Insurance Contracts, which replaces IFRS 4. The amendments introduce two options for entities issuing insurance contracts: a temporary exemption from applying IFRS 9 and an overlay approach. These amendments do not have any impact on the Company's financial statements.

ii. **Changes in accounting policies and disclosures** (continued)

New and amended standards and interpretations (continued)

Amendments to IAS 28 ‘Investments in associates and joint ventures’ - Clarification that measuring investees at fair value through profit or loss is an investment-by-investment choice

The amendments clarify that an entity that is a venture capital organization, or other qualifying entity, may elect, at initial recognition on an investment-by-investment basis, to measure its investments in associates and joint ventures at fair value through profit or loss. If an entity that is not itself an investment entity, has an interest in an associate or joint venture that is an investment entity, then it may, when applying the equity method, elect to retain the fair value measurement applied by that investment entity associate or joint venture to the investment entity associate’s or joint venture’s interests in subsidiaries. This election is made separately for each investment entity associate or joint venture, at the later of the date on which: (a) the investment entity associate or joint venture is initially recognized; (b) the associate or joint venture becomes an investment entity; and (c) the investment entity associate or joint venture first becomes a parent. These amendments do not have any impact on the Company’s financial statements.

Amendments to IFRS 1 ‘First-time adoption of International Financial Reporting Standards’ - Deletion of short-term exemptions for first-time adopters

Short-term exemptions in paragraphs E3–E7 of IFRS 1 were deleted because they have now served their intended purpose. These amendments do not have any impact on the Company’s financial statements.

Standards issued but not yet effective

The standards and interpretations that are issued, but not yet effective, up to the date of issuance of the Company's financial statements are disclosed below. The Company intends to adopt these standards, if applicable, when they become effective.

- Amendments to IAS 28 – Long-term Interests in Associates and Joint Ventures – Effective 1 January 2019
- Amendments to IFRS 9 – Prepayment Features with Negative Compensation – Effective 1 January 2019
- IFRS 16, 'Leases' – Effective 1 January 2019
- IFRS 17, 'Insurance Contracts' - Effective 1 January 2022
- IFRIC 23, 'Uncertainty over Income Tax Treatments' – Effective 1 January 2019
- Amendments to IFRS 10 and IAS 28 - Sale or Contribution of Assets between an Investor and its Associate or Joint Venture
- Annual improvements to IFRS standards 2015 – 2017 cycle, resulting in amendments to IFRS 3, IFRS 11, IAS 12 and IAS 23 - Effective 1 January 2019
- Amendments to IAS 19 - Plan Amendment, Curtailment or Settlement - Effective 1 January 2019
- Amendments to References in the Conceptual Framework in IFRS Standards - Effective 1 January 2020
- Amendments to IFRS 3 – Definition of Business – Effective 1 January 2020
- Amendments to IAS 1 and IAS 8 – Definition of Material – Effective 1 January 2020

2. Significant Accounting Policies (continued)

iii. Significant accounting estimates, assumptions and judgments

The preparation of the Company's financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets, liabilities, the accompanying disclosures and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

Judgments

In the process of applying the Company's accounting policies, management has made the following judgments, which have the most significant effect on the amounts recognised in the financial statements.

Provision for impairment of trade receivables

Management exercises judgement in determining the adequacy of provisions for the trade accounts receivables balances for which collections are considered doubtful. Judgement is used in the assessment of the recoverability of long outstanding balances. Actual outcomes may be materially different from the provision established by management. The accounting policies related to impairment of trade receivables is disclosed in Note 2 (xii).

Provisions and contingencies

Judgment is exercised by management to distinguish between provisions and contingencies. Policies on recognition and disclosure of provision are discussed in Note 2 (xix).

Estimates and assumptions

Useful lives and residual values of property, plant and equipment

The useful lives of property and equipment are estimated based on the period over which the assets are expected to be available for use. The estimated useful lives of assets are reviewed periodically and are updated if expectations differ from previous estimates due to physical wear and tear, technical or commercial obsolescence and legal or other limits on the use of the Company's assets. In addition, the estimation of the useful lives is based on Company's collective assessment of industry practice, internal technical evaluation and experience with similar assets. It is possible, however, that future results of operations could be materially affected by changes in estimates brought about by changes in factors mentioned above. The amounts and timing of recorded expenses for any period would be affected by changes in these factors and circumstances. A reduction in the estimated useful lives of assets would increase the recognised operating expenses and decrease non-current assets.

BERGER PAINTS TRINIDAD LIMITED

NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2018
(Expressed in thousands of Trinidad and Tobago dollars)
(Continued)

2. **Significant Accounting Policies (continued)**

iii. **Significant accounting estimates, assumptions and judgments (continued)**

Taxes

Uncertainties exist with respect to the interpretation of complex tax regulations and the amount and timing of future taxable income. Given the existence of international business relationships and the long-term nature and complexity of existing contractual agreements, differences arising between the actual results and the assumptions made, or future changes to such assumptions, could necessitate future adjustments to tax income and expense already recorded. The Company establishes provisions, based on reasonable estimates, for possible consequences of audits by the tax authorities. The amount of such provisions is based on various factors, such as experience of previous tax audits and differing interpretations of tax regulations. Such differences of interpretation may arise on a wide variety of issues depending on the conditions prevailing at that time.

Employee benefits- defined benefit pension plans

The Company operates two defined benefit pension plans. The calculation of defined benefit expenses and obligations requires significant judgement as the recognition is dependent on discount rates, expected rates of return on assets, and various actuarial assumptions such as projected salary increases, retirement age, and mortality and termination rates. Due to the long-term nature of these plans, such estimates and assumptions are subject to inherent risks and uncertainties. For our pension and other post-employment plans, the discount rate is determined by reference to market yields on government securities. Since the discount rate is based on currently available yields, and involves management's assessment of market liquidity, it is only a proxy for future yields. The expected rate of return on assets is set equal to the discount rate.

Actuarial assumptions may differ from actual experience as specific statistics is only an estimate for future employee behaviour. These assumptions are determined by management and are reviewed by actuaries at least annually. Changes to any of the above assumptions may affect the amounts of benefits obligations and expenses that are recognised.

Valuation of leasehold buildings

The Company's leasehold properties are measured at fair value for financial reporting purposes. In estimating the fair value of the leasehold buildings, the Company engages third party qualified valuers to perform the valuation. The Company works closely with the qualified external valuers to establish the appropriate valuation techniques and inputs to the model. Information about the valuation technique and inputs used in determining the fair value of the leasehold building is disclosed in Note 3 (xxvi).

BERGER PAINTS TRINIDAD LIMITED

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2018
(Expressed in thousands of Trinidad and Tobago dollars)
(Continued)**

2. Significant Accounting Policies (continued)

iv. Cash and cash equivalents

Cash and cash equivalents include cash in bank and on hand and bank overdrafts that are repayable within three months of their advance and which are subject to an insignificant risk of changes in value.

v. Inventories

Inventories are valued at the lower of cost and net realisable value. Cost is determined using the weighted average cost method as follows:

- i) Raw materials are valued at the lower of cost, on the average cost basis, and net realisable value.
- ii) Work in progress is valued at the lower of raw material cost and net realisable value.
- iii) Finished goods are valued at the lower of cost of production (which comprises raw materials, direct labour, other direct costs and related production overheads based on normal capacity) and net realisable value.

Goods in transit and other supplies are valued at invoice cost.

Net realisable value is the estimated selling price in the ordinary course of business, less applicable variable selling, marketing and distribution expenses, necessary to make the sale.

vi. Property, plant and equipment

Leasehold buildings are measured at fair value based on valuations carried out by professional independent valuers less subsequent depreciation for buildings and leasehold improvements. All other property, plant and equipment and leasehold land are stated at historical cost less depreciation.

Increases in the carrying amount arising on revaluation are credited to the revaluation reserve in the shareholders' equity. Decreases that offset previous increases of the same asset are charged against the revaluation reserve; all other decreases are charged to the statement of profit or loss and other comprehensive income. Each period the difference between depreciation based on the revalued carrying amount of the asset (the depreciation charged to the statement of profit or loss and other comprehensive income) and depreciation based on the asset's original cost is transferred from revaluation reserve to retained earnings.

BERGER PAINTS TRINIDAD LIMITED

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2018**
(Expressed in thousands of Trinidad and Tobago dollars)
(Continued)

2. Significant Accounting Policies (continued)

vi. Property, plant and equipment (continued)

Depreciation is calculated on the straight-line method to write off the cost of each asset or its revalued amount to its estimated residual values over its estimated useful life as follows:

Leasehold properties	Over the remaining life of the leases
Plant and machinery	4-12½ years
Office furniture and fixtures	8-10 years
Vehicles	4-5 years

The assets' residual values and useful lives are reviewed, and adjusted if appropriate at each statement of financial position date or when changes in circumstances indicate that impairment may have occurred.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Property, plant and equipment under construction are recorded as construction-in-progress until ready for their intended use; thereafter they are transferred to the related category of property, plant and equipment and depreciated over their estimated useful lives.

Costs of borrowings, for acquisition of property, plant and equipment are capitalised to property, plant and equipment under construction until the assets are ready for their intended use. Repairs and renovations are normally expensed as they are incurred. Expenses are reported as assets only if the amounts involved are substantial and one or more of the following conditions is satisfied: the original useful life is prolonged, the production capacity is increased, the quality of the products is enhanced materially or production costs are reduced considerably.

The gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in the statement of profit or loss and other comprehensive income.

The carrying amount of leasehold property is revalued whenever events or changes in circumstances indicate that impairment or appreciation may have occurred.

BERGER PAINTS TRINIDAD LIMITED

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2018
(Expressed in thousands of Trinidad and Tobago dollars)
(Continued)**

2. Significant Accounting Policies (continued)

vii. Intangible assets

Intangible assets acquired separately are reported at cost less accumulated amortisation and impairment losses. Amortisation is charged on a straight line basis utilising rates, which are sufficient to write off the assets over their estimated useful lives. The estimated useful life and amortisation method are reviewed annually, with the effect of any changes in estimate being accounted for on a prospective basis. The rate utilised is 33½%.

Expenditure on research activities is recognised as an expense in the period in which it is incurred.

The amount initially recognised for internally-generated intangible assets is the sum of the expenditure incurred from the date when the intangible asset first meets the recognition criteria listed above. Where no internally generated intangible asset can be recognised, development expenditure is recognised in the statement of profit or loss and other comprehensive income in the period in which it is incurred.

Subsequent to initial recognition, internally-generated intangible assets are reported at cost less accumulated amortisation and accumulated impairment losses, on the same basis as intangible assets that are acquired separately.

viii. Income and expenditure

Income and expenditure transactions are accounted for on the accrual basis.

ix. Revenue from contracts with customers

Revenue from contracts with customers is recognised when control of the goods is transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods. The Company is principal in its revenue arrangements, because it controls the goods before transferring them to the customer.

Revenue from the sale of products to third parties is recognised at the point in time when control of the asset is transferred to the customer, generally on delivery of the items. The Company considers whether there are other promises in the contract that are separate performance obligations to which a portion of the transaction price needs to be allocated (e.g. providing servicing). In determining the transaction price for sales, the Company considers the effects of variable consideration, the existence of significant financing components, non-cash consideration, and consideration payable to the customer (if any).

BERGER PAINTS TRINIDAD LIMITED

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2018
(Expressed in thousands of Trinidad and Tobago dollars)
(Continued)**

2. Significant Accounting Policies (continued)

x. Foreign currency transactions

Items included in the financial statements of the Company are measured using the currency of the primary economic environment in which the Company operates ('the functional currency'). The financial statements are presented in Trinidad and Tobago dollars, which is the Company's functional and presentation currency.

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign currency exchange gains and losses resulting from the settlement of such transactions and from the translation at period-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the statement of profit or loss and other comprehensive income.

xi. Retirement benefit costs and termination benefits

A defined benefit plan is a pension plan that is not a defined contribution plan. The pension accounting costs for the plans are assessed using the projected unit credit method. Re-measurements, comprising of actuarial gains and losses, the effect of the asset ceiling, excluding net interest (not applicable to the Company) and the return on plan assets (excluding net interest), are recognised immediately in the statement of financial position with a corresponding debit or credit to retained earnings through other comprehensive income in the period in which they occur. Re-measurements are not reclassified to profit or loss in subsequent periods. The maximum economic benefits available, as limited by the asset ceiling will crystallise in the form of reductions in future contributions.

Past service costs are recognised in profit or loss on the earlier of:

- The date of the plan amendment or curtailment, and
- The date that the Group recognises restructuring-related costs.

Net interest is calculated by applying the discount rate to the net defined benefit liability or asset. The Group recognises the following changes in the net defined benefit obligation within "administrative and distribution costs" (Note 19):

- Service costs comprising current service costs, past-service costs, gains and losses on curtailments and non-routine settlements; and
- Net interest expense or income.

BERGER PAINTS TRINIDAD LIMITED

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2018
(Expressed in thousands of Trinidad and Tobago dollars)
(Continued)**

2. Significant Accounting Policies (continued)

xii. Trade and other receivables

Trade receivables are carried at original invoice amount less allowance made for impairment of these receivables. An allowance for impairment of trade receivables is established when there is objective evidence that the Company will not be able to collect all amounts due according to the original terms of the receivables. The amount of the allowance is the difference between the carrying amount and the recoverable amount. Other receivables are measured at cost less any impairment.

xiii. Financial instruments: Short term borrowings

Other financial liabilities, including borrowings, are initially measured at fair value, net of transaction cost. Other financial liabilities are subsequently measured at amortised cost using the effective interest method, with interest expense recognised on an effective yield basis.

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments through the expected life of the financial liability, or, where appropriate, a shorter period.

xiv. Financial assets

Trade receivables, loans, and other receivables that have fixed or determinable payments that are not quoted in an active market are classified as 'loans and receivables'. Loans and receivables are measured at amortised cost using the effective interest method, less any impairment. Interest income, if applicable, is recognised by applying the effective interest rate.

xv. Impairment of non-financial assets

An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use. For the purpose of assessing impairment, assets are grouped at the lowest levels for which there are largely independent cash inflows (cash-generating units). Prior impairments of non-financial assets (other than goodwill) are reviewed for possible reversal at each reporting date.

BERGER PAINTS TRINIDAD LIMITED

NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2018
(Expressed in thousands of Trinidad and Tobago dollars)
(Continued)

2. Significant Accounting Policies (continued)

xvi. Impairment of financial assets

Under IAS 39 – Policy applicable prior to 1 January 2018.

The Company assesses at each reporting period whether there is objective evidence that a financial asset or a group of financial assets is impaired. A financial asset or group of financial assets is impaired and impairment losses are incurred only if there is objective evidence of impairment as a result of one or more events that have occurred after the initial recognition of the asset (a 'loss event') and that loss event (or events) has an impact on the estimated future cash flows of the financial assets or group of financial assets that can be reliably estimated.

If there is objective evidence that an impairment loss has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced through the use of an allowance account and the amount of the loss is recognised in the statement of profit or loss. If a financial asset has a variable interest rate, the discount rate for measuring any impairment loss is the current effective interest rate determined under the contract. As a practical expedient, the Company may measure impairment on the basis of an instrument's fair value using an observable market price.

When a financial asset is uncollectible, it is written off against the related impairment loss. Such financial assets are written off after all the necessary procedures have been completed and the amount of the loss has been determined.

If in the subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed by adjusting the allowance account. The amount of the reversal is recognised in the statement of profit or loss and other comprehensive income.

Under IFRS 9 – Policy applicable from 1 January 2018.

The Company applied a simplified approach in calculating ELCs for trade receivables. Therefore, the Company does not track changes in credit risk, but instead recognises a loss allowance based on ELCs at each reporting date. The Company has established a provision matrix that is based on its historical credit loss experience, adjusted where applicable for forward-looking factors specific to the debtors and the economic environment. The Company considers trade receivables in default when contractual payments are 180 days past due. However, in certain cases, the Company may also consider trade receivables to be in default when internal or external information indicates that the company is unlikely to receive the outstanding contractual amounts in full before taking into account any credit enhancements held by the Company. Trade receivables is written off when there is no reasonable expectation of recovering the contractual cashflows.

BERGER PAINTS TRINIDAD LIMITED

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2018
(Expressed in thousands of Trinidad and Tobago dollars)
(Continued)**

2. Significant Accounting Policies (continued)

xvii. Segment reporting

A business segment is a group of assets and operations engaged in providing products or services that are subject to risks and returns that are different from those of other business segments. A geographical segment is engaged in providing products or services within a particular economic environment that are subject to risks and return that are different from those of segments operating in other economic environments.

xviii. Borrowings

Borrowings are recognised initially at cost, being their issue proceeds, net of transaction costs incurred. Subsequently, borrowings costs are stated at amortised cost and any difference between net proceeds and the redemption value is recognised in the statement of profit or loss and other comprehensive income over the period of the borrowings using the effective interest method.

xix. Provisions

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that the Company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. Where a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows.

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognised as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognised even if the likelihood of an outflow with respect to any one item included in the same class of obligation may be small.

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2018
(Expressed in thousands of Trinidad and Tobago dollars)
(Continued)**

2. Significant Accounting Policies (continued)

xx. Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

i) Current tax

The tax currently payable is based on taxable profit for the period. Taxable profit differs from profits as reported in the statement of profit or loss and other comprehensive income because it excludes items of income or expense that are taxable or deductible in other periods and it further excludes items that are never taxable or deductible. The liability for current tax is calculated using tax rates that have enacted or substantively enacted by the end of the reporting period.

ii) Deferred tax

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Such deferred tax assets and liabilities are not recognised if the temporary difference arises from goodwill or from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit. The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

BERGER PAINTS TRINIDAD LIMITED

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2018
(Expressed in thousands of Trinidad and Tobago dollars)
(Continued)**

2. Significant Accounting Policies (continued)

xx. Taxation (continued)

ii) Deferred tax (continued)

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off, current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Company intends to settle its current tax assets and liabilities on a net basis.

Current and deferred tax are recognised as an expense or income. In the statement of profit or loss and other comprehensive income, except when they relate to items that are recognised outside profit or loss (whether in other comprehensive income or directly in equity), in which case the tax is also recognised outside profit or loss, or where they arise from the initial accounting for a business combination.

xxi. Leases

Leases of property, plant and equipment where the Company assumes substantially all the benefits and risks of ownership are classified as finance leases. Finance leases are capitalised at the estimated present value of the underlying lease payments. Each lease payment is allocated between the liability and finance charges so as to achieve a constant rate on the finance balance outstanding. The corresponding rental obligations, net of finance charges, are included in non-current and current liabilities.

The interest element of the finance charge is charged to the statement of profit or loss and other comprehensive income over the lease period. The property, plant and equipment acquired under finance leasing contracts are depreciated over the useful life of the asset

Leases of assets under which all the risks and benefits of ownership are effectively retained by the lessors are classified as operating leases. Payments made under operating leases are charged to the statement of profit or loss and other comprehensive income on a straight-line basis over the period of the lease.

When an operating lease is terminated before the lease period has expired, any payment required to be made to the lessor by way of penalty is recognised as an expense in the period in which termination takes place.

(Expressed in thousands of Trinidad and Tobago dollars)
(Continued)**

2. Significant Accounting Policies (continued)

xxii. Dividends

Dividends that are proposed and declared during the period are accounted for as an appropriation of retained earnings in the statement of changes in equity.

Dividends that are proposed after the statement of financial Position date are not shown as a liability on the statement of financial position but are disclosed as a note to the accounts.

xxiii. Issued capital

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares are shown in equity as a deduction, net of tax, from the proceeds.

xxiv. Current versus non-current distinction

The Company presents assets and liabilities in the statement of financial position based on current/non-current classification. An asset is current when it is:

- Expected to be realised or intended to be sold or consumed in a normal operating cycle;
- Held primarily for the purpose of trading;
- Expected to be realised within twelve months after the reporting period; or
- Cash or cash equivalents unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is current when:

- It is expected to be settled in a normal operating cycle;
- It is held primarily for the purpose of trading;
- It is due to be settled within twelve months after the reporting period; or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

The Company classifies all other liabilities as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

(Expressed in thousands of Trinidad and Tobago dollars)
(Continued)**

2. Significant Accounting Policies (continued)

xxv. Trade and other payables

Liabilities for trade and other amounts payable, which are normally settled on 30-90-day terms, are carried at cost, which is the fair value of the consideration to be paid in the future for goods and services received, whether or not billed to the Company.

xxvi. Fair value measurement

The Company measures certain financial instruments at fair value at each reporting date. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible to by the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities;
- Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable; and
- Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2018**
(Expressed in thousands of Trinidad and Tobago dollars)
(Continued)

3. Property, plant and equipment (continued)

The Company's leasehold properties are stated at their revalued amounts, being the fair value at the date of revaluation, less any subsequent accumulated depreciation and subsequent accumulated impairment losses. The leasehold properties were revalued by professional valuers, on a market value basis as at 3 August 2018.

The fair value was determined using the direct comparable method. The method is the analysis of prices being paid for comparable properties in the open market with reasonable practical adjustment to arrive at market value. There has been no change to the valuation technique during the period.

Management is of the opinion that there were no significant fluctuations in value during the current period.

Details of the Company's leasehold properties and information about the fair value hierarchy are as follows:

Leasehold properties	Level 1	Level 2	Level 3	Total
	\$	\$	\$	\$
31 December 2018	—	—	1,710	1,710
31 December 2017	—	—	2,315	2,315

There were no transfers between Levels 1, 2 and 3 during the period.

The historical cost and accumulated depreciation on the revalued assets were:

	2018	2017
	\$	\$
Historical cost	4,369	4,369
Transfer	(400)	—
Accumulated depreciation	(3,700)	(3,645)
Net book value	<u>269</u>	<u>724</u>

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2018

(Expressed in thousands of Trinidad and Tobago dollars)

(Continued)

4. Employee benefits liability

The Company maintains two contributory defined benefit pension plans (the "Pension Plans") which offer its employees retirement benefits depending on length of service.

Benefits for the Pension Plans are calculated based on the number of years of service and by reference to an average of a member's last twelve months basic wage. The pension obligations are valued using the projected unit credit method. The assets of the Pension Plans are valued on the basis of market related values.

The Plans' assets are held in trust and invested on a long-term basis. Investment strategy is largely dictated by local investments restrictions (maximum of 50% in equities and 20% overseas) and asset availability since the local equity market is small and there is little secondary market activity in debt securities. The Pension Plans are not permitted to invest in assets of the Company.

vii) Asset allocation:		
Local equities – quoted	9,688	9,638
Local bonds	13,887	14,457
Foreign investments	6,459	6,425
Mutual funds	1,615	1,285
Short term securities	646	322
Deposit administration contract	<u>4,448</u>	<u>3,929</u>
Fair value of plan assets	<u>36,743</u>	<u>36,056</u>

All asset values as at 31 December 2018 were estimated using the asset values as at 31 December 2017, provided by the Trustee. Overseas equities have quoted prices in active markets. Local equities also have quoted prices but the market is relatively illiquid. A fair value is placed on the Plans' bonds by discounting expected future proceeds.

The majority of the Plans' government bonds were issued by the Government of Trinidad & Tobago, which also guarantees many of the corporate bonds held by the Plan.

The Monthly Paid Plan's assets are invested in a strategy agreed with the Plan's Trustee and Management Committee. This strategy is largely dictated by statutory constraints (at least 80% of the assets must be invested in Trinidad & Tobago and no more than 50% in equities) and the availability of suitable investments. The Weekly Paid Plan is fully invested in a Deposit Administration Account with Guardian Life.

The Weekly Paid Plan secures its pensions in payment by annuity purchase. The Monthly Paid Plan has a few pensions in payment secured by CLICO annuities, but it no longer purchases annuities for new retirees.

4. Employee benefits liability (continued)

- viii) The principal actuarial assumptions used in determining net pension cost and the funded status of the plan are as follows:

	2018	2017
	%	%
Discount rate:		
- Pension plan active members and deferred pensioners	5.0	5.0
Expected return on non-annuity pension plan assets	5.0	5.0
Expected return on insures annuity assets	5.0	5.0
Future salary increases	3.0	3.0
Future wage increases	3.0	3.0
Life expectancy		
- Male	81.0	81.0
- Female	85.0	85.0

ix) Sensitivity analysis:	2018	2017
	\$	\$
Benefit obligations would increase/(reduce)		
Reducing discount rate by 1%	5,869	5,458
Increasing discount rate by 1%	(4,678)	(4,358)
Reducing salary by 1% per annum	(1,184)	(1,347)
Increasing salary by 1% per annum	1,338	1,516

x) Funding:

The Company meets the balance of the cost of funding the two defined benefit Pension Plans and the Company must pay contributions at least equal to those paid by members, which are fixed. The funding requirements are based on triennial actuarial valuations of the Plans and the assumptions used to determine the funding required may differ from those set out above. The Company expects to pay \$0.92 million to the pension plans over 2019.

xi) Maturity profile:	2018	2017
The weighted average duration of the defined benefit obligation at end of year (in years) is:	14	14

Amounts due to parent company (Note 7)	<u>6,102</u>	<u>6,086</u>
	<u>6,102</u>	<u>7,392</u>

The Company obtained a United States Dollar commercial ordinary loan in the original amount of US\$500,000 from Republic Bank Limited on 30 August 2016 to meet its working capital commitments to foreign suppliers. Interest was repayable at United States Dollar 6 month LIBOR plus 5% per annum with a floor rate of 6% per annum, over a 7-month term. The loan was secured by a lien over the Company's Trinidad and Tobago Dollar account for TT\$375,000. This loan was settled during 2018.

On 8 May 2018, the Company obtained short term notes amounting to US\$400,000 from its Parent Company, with an original maturity date of 8 November 2017. These notes were renewed on 10 December 2018 and mature on 7 November 2019. Interest is set at one (1) month USD LIBOR plus 1.4% p.a. payable on a quarterly basis.

On 8 June 2018, the Company obtained a short term note amounting to US\$500,000 from its Parent Company, with an original maturity date of 8 December 2017. These notes were renewed on 10 December 2018 and mature on 8 December 2019. Interest is set at one (1) month USD LIBOR plus 1.4% p.a. payable on a quarterly basis.

The future lease rentals payable are as follows:		
Not later than 1 year	<u>259</u>	<u>194</u>

BERGER PAINTS TRINIDAD LIMITED

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2018 (Expressed in thousands of Trinidad and Tobago dollars) (Continued)

23. Risk management

Introduction

Risk is inherent in the Company's activities, but it is managed through a process of ongoing identification, measurement and monitoring, subject to risk limits and other controls. This process of risk management is critical to the Company's continuing profitability and each individual within the Company is accountable for the risk exposures relating to their responsibilities. The Company is exposed to credit risk, liquidity risk and market risk.

Board of Directors

The Board of Directors of the Company is responsible for the overall risk management approach and for approving the risk strategies, principles, policies and procedures. Day to day adherence to risk principles is carried out by the executive management of the Company in compliance with the policies approved by the Board of Directors.

Treasury management

The Company's parent company employs a Treasury function which is responsible for managing the assets, liabilities and the overall financial structure of the Company. The Treasury function is also primarily responsible for the funding and liquidity risks of the Company.

Concentrations of risk

Concentrations arise when a number of counterparties are engaged in similar business activities, or activities in the same geographical region, or have economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic, political or other conditions.

Concentrations indicate the relative sensitivity of the Company's results to developments affecting a particular industry. In order to avoid excessive concentrations of risk, the Company's procedures include specific monitoring controls to focus on the maintenance of a diversified portfolio.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2018

(Expressed in thousands of Trinidad and Tobago dollars)

(Continued)

23. Risk management (continued)

Interest rate risk

Interest rate risk arises from the possibility that changes in interest rates will affect future cash flows or the fair values of financial instruments. The Company manages its interest rate exposure by accepting fixed rates on its borrowings over the respective term. As the interest rates remain fixed over their lives, the risk of fluctuations in market conditions is mitigated.

Currency risk

Currency risk is the risk that the value of a financial instrument will fluctuate due to changes in foreign exchange rates. Such exposure arises from sales or purchases by an operating unit in currencies other than the unit's functional currency. Management monitors its exposure to foreign currency fluctuations and employs appropriate strategies to mitigate any potential losses. The aggregate value of financial assets and liabilities by reporting currency are as follows:

Year ended 31 December 2018	TTD	USD	TOTAL
	\$	\$	\$
ASSETS			
Cash and cash equivalents	5,685	615	6,300

Effect on profit before tax		<u>(229)</u>	<u>(229)</u>

Credit risk management

The Company takes on exposure to credit risk, which is the potential for loss due to a debtor's failure to pay amounts when due. Impairment provisions are established for losses that have been incurred at the end of the reporting period. The Company extends credit to recognised, creditworthy third parties who are subject to credit verification procedures. Significant changes in the economy, or in the state of a particular industry segment that represents a concentration in the Company's portfolio, could result in losses that are different from those provided at the end of the reporting period. Management therefore carefully manages its exposure to credit risk.

The Company structures the level of credit risk it undertakes by placing limits on the amount of risk accepted in relation to one debtor, or group of debtors, and to geographical and industry segments. Such risks are monitored on an ongoing basis, and limits on the levels of credit risk that the Company can engage in are approved by the Board of Directors. Exposure to credit risk is further managed through regular analysis of the ability of debtors to settle outstanding balances.

BERGER PAINTS TRINIDAD LIMITED

NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2018
(Expressed in thousands of Trinidad and Tobago dollars)
(Continued)

23. Risk management (continued)

Credit risk management (continued)

The following table shows the maximum exposure to credit risk which represents a worst-case scenario of credit risk exposure.

	Gross maximum exposure	
	2018 \$	2017 \$
Trade and other receivables	14,192	16,542
Amounts due from related parties	319	41
Cash and cash equivalents	<u>6,300</u>	<u>9,228</u>
Total	<u>20,811</u>	<u>25,811</u>

Credit risk is the risk that a counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Group is exposed to credit risk from its operating activities (primarily trade receivables) and from its financing activities, including deposits with banks and financial institutions, foreign exchange transactions and other financial instruments.

Trade receivables

Customer credit risk is managed by each business unit subject to the Company's established policy, procedures and control relating to customer credit risk management. Credit quality of a customer is assessed based on an extensive credit rating scorecard and individual credit limits are defined in accordance with this assessment. Outstanding customer receivables are regularly monitored and any shipments to major customers are generally covered by letters of credit or other forms of credit insurance obtained from reputable banks and other financial institutions.

An impairment analysis is performed at each reporting date using a provision matrix to measure expected credit losses. The provision rates are based on days past due for Groupings of various customers segments with similar loss patterns. The calculation reflects the probability-weighted outcome, the time value of money and reasonable and supportable information that is available at the reporting date about past events, current conditions and forecasts of future economic conditions. Generally trade receivables are written off if past due for more than six months although they continue to be subject to enforcement activity,

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2018**
(Expressed in thousands of Trinidad and Tobago dollars)
(Continued)

23. Risk management (continued)

Credit risk management (continued)

Set out below is the information about the credit risk exposure on the Group's trade receivables and contract assets using a provision matrix:

	Trade Receivables – as at 31 December 2018					Total
	Current	Over 30 days	Over 90 days	Over 180 days	Over 2 years	
Expected credit loss rate	0.32%	0.35%	2%	97%	100%	
Estimated total gross	4,717	7,046	1,908	4,516	128	18,315
Expected credit loss	15	25	38	4,372	128	4,578

Liquidity risk

Liquidity risk is the risk that the Company will be unable to meet its payment obligations when they fall due under normal and stress circumstances. The Company monitors its liquidity risk by considering the maturity of its financial assets and projected cash flows from operations. Where possible the Company utilises surplus internal funds to a large extent to finance its operations and ongoing projects. However, the Company also utilises available credit facilities such as loans, overdrafts and other financing options where required.

The table below summarises the maturity profile of the Company's financial liabilities based on contractual payments.

Year ended 31 December 2018	Up to 1 year \$	1 to 5 years \$	Total \$
Short term borrowings	6,102	—	6,102
Due to related parties	15,119	—	15,119
