| 2.28 Comparative information                                                   | 46    | 41. Adjustment for non-cash items in operating profit                 | 109     |
| 3. Critical accounting estimates and judgments in applying accounting policies | 47-50 | 42. Fair value measurement                                            | 109-112 |
| 4. Management of Insurance and Financial Risk                                  | 51    | 43. Segment information                                               | 113-116 |
| 4.1 Insurance risk                                                             | 51-61 | 44. Contingent liabilities                                            | 116     |
| 4.2 Financial risk                                                             | 61-74 | 45. Commitments                                                       | 116     |
| 5. Property, plant and equipment                                               | 75-76 | 46. Related party disclosures                                         | 117-118 |
| 6. Investment properties                                                       | 76-77 | 47. Assets under management                                           | 119     |
| 7. Intangible assets                                                           | 78-79 | 48. Pledged assets                                                    | 119     |
| 8. Investment in associated companies                                          | 80    | 49. Impact of initial application of IFRS 9                           | 120-121 |
|                                                                                |       | 50. IFRS 9 transition disclosures                                     | 122-123 |

## **INDEPENDENT AUDITOR'S REPORT**

### **TO THE SHAREHOLDERS OF GUARDIAN HOLDINGS LIMITED**

#### **Report on the Audit of the Consolidated Financial Statements**

##### **Opinion**

We have audited the consolidated financial statements of Guardian Holdings Limited and its subsidiaries ("the Group"), which comprise the consolidated statement of financial position as at 31 December 2018, and the consolidated statements of income, comprehensive income, changes in equity and cash flows for the year then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the financial position of the Group as at 31 December 2018 and its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards ("IFRSs").

##### **Basis for Opinion**

We conducted our audit in accordance with International Standards on Auditing ("ISAs"). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Group in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants ("IESBA Code"), and we have fulfilled our other ethical responsibilities in accordance with the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

##### **Key Audit Matters**

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context.

We have fulfilled the responsibilities described in the Auditor's Responsibilities for the Audit of the Consolidated Financial Statements section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the consolidated financial statements. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the accompanying consolidated financial statements.

| <p><b>Estimates used in the calculation of Insurance Contracts' Liability</b></p> <p>The Group has significant insurance liabilities of TT\$16.9 billion representing 71% of the Group's total liabilities. The valuation of insurance contract liabilities involves extensive judgment and is dependent on a number of subjective assumptions, including primarily the timing and ultimate settlement value of long-term policyholder liabilities as well as the estimation of claims incurred, whether reported or not, for short term insurance contracts.</p> <p>Various economic and non-economic key assumptions are being used to estimate the long-term liabilities. Specifically, the Group estimates the expected number and timing of deaths, persistency, future expenses and future investment income arising from the assets backing long term insurance contracts.</p> <p>For short term insurance contracts, in calculating the estimated cost of unpaid claims (both reported and incurred but not reported (IBNR)), the Group uses a combination of loss-ratio-based estimates and estimates based upon actual claims experience.</p> <p>The Group uses valuation models to support the calculations of these insurance contract liabilities. The complexity of the models may give rise to errors as a result of inadequate/incomplete data or the design or application of the models.</p> | <p>We involved our own actuarial specialists to assist us in performing our audit procedures in this area, which included among others:</p> <ul style="list-style-type: none"> <li>• Assessment of the key assumptions applied including consideration of emerging trends and studies on mortality and morbidity, voluntary terminations, persistency, investment returns, policy maintenance and administrative expenses, inflation and tax rates.</li> <li>• Recalculation of technical provisions produced by the models on a sample basis.</li> <li>• An assessment of the internal controls regarding the maintenance of the policyholder database and the completeness and accuracy of the data underlying the valuations.</li> <li>• An analysis of the movements in insurance liabilities during the year. We assessed whether the movements are in line with changes in assumptions adopted by the Group, our understanding of developments in the business and our expectations derived from market experience.</li> <li>• We considered whether the Group's disclosures in Notes 2, 4 and 20 of the consolidated financial statements in relation to insurance contract liabilities were compliant with the relevant accounting requirements.</li> </ul> |

| <p>The Group invests in various asset classes, of which 46% or TT\$12.5 billion is carried at fair value in the statement of financial position. Of these assets, 70% or TT\$8.7 billion are related to investments for which no published prices in active markets are available and have been classified as Level 2 and Level 3 assets in Note 42 within the IFRS fair value hierarchy.</p> <p>Valuation techniques for these investments can be subjective in nature and involve various assumptions regarding pricing factors. Associated risk management disclosures are complex and dependent on high quality data. A specific area of audit focus includes the valuation of fair value Level 2 assets and Level 3 assets where valuation techniques are applied in which unobservable inputs are used.</p> <p>For Level 2 and Level 3 assets, these techniques include the use of recent arm's length transactions, reference to other instruments that are substantially the same and discounted cash flow analyses making maximum use of market inputs, such as the market risk free yield curve. External valuers are involved in the valuation of freehold and leasehold properties and investment properties.</p> | <p>We independently tested the pricing on quoted securities, and we used our valuation specialists to assess the appropriateness of pricing models used by the Group. This included:</p> <ul style="list-style-type: none"> <li>• An assessment of the pricing model methodologies and assumptions against industry practice and valuation guideline.</li> <li>• Testing of the inputs used, including cash flows and other market based data.</li> <li>• An evaluation of the reasonableness of other assumptions applied such as credit spreads.</li> <li>• The re-performance of valuation calculations on a sample basis of internally priced securities that were classified as higher risk and estimation.</li> </ul> <p>With respect to the valuation of freehold properties and investment properties, our valuation experts considered the objectivity, independence and expertise of the external appraisers. They also assessed the correctness of the property-related data used as input for the valuations, analyzed the valuations and challenged the underlying assumptions. We further evaluated the adequacy of the disclosures on the valuation of freehold properties and investment properties included in notes 2.5, 2.6, 5 and 6 of the consolidated financial statements.</p> <p>Finally, we assessed whether the financial statement disclosures, including sensitivity to key inputs and the IFRS fair value hierarchy, appropriately reflect the Group's exposure to financial instrument valuation risk in notes 3 (d) and 42.</p> |

| <p>The Group adopted IFRS 9, Financial Instruments effective 1 January 2018. The standard introduced a new classification and measurement approach for financial instruments. Financial instruments are classified as follows on the basis of their contractual cash flows and the business model under which they are held:</p> <ul style="list-style-type: none"> <li>- At fair value through profit or loss (FVPL), or</li> <li>- Amortised cost, or</li> <li>- Fair value through other comprehensive income (FVOCI)</li> </ul> <p>The standard changes the evaluation of credit losses from an incurred approach to an expected credit loss ("ECL") model which requires management judgment and incorporation of forward-looking information. IFRS 9 requires the Group to record an allowance for ECLs on all financial instruments not carried at FVPL.</p> <p>This is a key audit matter as the estimation of ECLs is inherently uncertain and requires the application of judgment and use of subjective assumptions by management.</p> <p>The areas of significant judgment include:</p> <ul style="list-style-type: none"> <li>- Determining the criteria for a significant increase in credit risk</li> <li>- Techniques used to determine probability of default (PD) and loss given default (LGD); and</li> <li>- Selection of forward-looking macroeconomic scenarios</li> </ul> | <p>We obtained an understanding of the Group's business models and for a sample of investments ensured that the financial instruments were classified in accordance with the approved business models.</p> <p>We used our valuation experts to assess the reasonableness of the IFRS 9 ECL Methodology implemented by the Group. Particularly our valuation experts assessed the Group's approach regarding significant increase in credit risk criteria, techniques used to determine PDs and LGDs and the incorporation of forward-looking information. We also compared the Group's IFRS 9 ECL Methodology to the requirements of the standard.</p> <p>We assessed the opening retained earnings adjustments as at 1 January 2018 in relation to the adoption of the new standard.</p> |

| <b>IFRS 9 Financial Instruments and related disclosures (continued)</b>                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| <p>These areas of judgment required a new IFRS 9 methodology to be established and new models to be built and implemented to measure expected credit losses.</p> <p>Differences between previously reported and new carrying amounts of financial instruments as a result of the implementation of the new ECL model as at 1 January 2018 of TT\$276.7 million have been recognized in opening retained earnings.</p> | <p>We tested the ECL model by performing the following:</p> <ul style="list-style-type: none"> <li>- Verified the PDs, LGDs, Exposure at Default (EAD) and key data input fields such as nominal amount, credit ratings, effective interest rates, financial statement values, maturity dates and issue dates to source documents.</li> <li>- Recalculated the 12-month and Life-Time ECL for a sample of instruments to ensure that they were in accordance with the approved IFRS 9 Group Methodology.</li> <li>- Tested that the threshold for a significant increase in credit risk was appropriately applied.</li> <li>- Obtained an understanding of the forward looking macroeconomic assessment and ensured that any adjustments to credit ratings were appropriately applied in the ECL models.</li> <li>- Tested the completeness of the amounts assessed for impairment.</li> </ul> <p>Finally, we assessed the disclosures included in notes 2.9, 2.11, 4.2.3(e), 49 and 50 of the consolidated financial statements considering whether they satisfy the requirements of IFRSs.</p> |

## INDEPENDENT AUDITOR'S REPORT

TO THE SHAREHOLDERS OF GUARDIAN HOLDINGS LIMITED

### **Report on the Audit of the Consolidated Financial Statements** (Continued)

#### **Other information included in the Group's 2018 Annual Report**

Other information consists of the information included in the Group's 2018 Annual Report, other than the consolidated financial statements and our auditor's report thereon. Management is responsible for the other information. The Group's 2018 Annual Report is expected to be made available to us after the date of this auditor's report.

Our opinion on the consolidated financial statements does not cover the other information and we will not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

#### **Responsibilities of Management and the Audit, Compliance and Risk Committee for the Consolidated Financial Statements**

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with IFRSs, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

The Audit, Compliance and Risk Committee is responsible for overseeing the Group's financial reporting process.

## INDEPENDENT AUDITOR'S REPORT

### TO THE SHAREHOLDERS OF GUARDIAN HOLDINGS LIMITED

#### **Report on the Audit of the Consolidated Financial Statements** (Continued)

##### **Auditor's Responsibilities for the Audit of the Consolidated Financial Statements**

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.

## INDEPENDENT AUDITOR'S REPORT

TO THE SHAREHOLDERS OF GUARDIAN HOLDINGS LIMITED

### Report on the Audit of the Consolidated Financial Statements

(Continued)

### Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

(Continued)

- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with the Audit, Compliance and Risk Committee regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the Audit, Compliance and Risk Committee with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with the Audit, Compliance and Risk Committee, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partner in charge of the audit resulting in this independent auditor's report is Adrienne D'Arcy.

The accompanying notes form an integral part of these consolidated financial statements.

## GUARDIAN HOLDINGS LIMITED

### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2018 Expressed in Trinidad and Tobago Dollars

#### **1. Incorporation and principal activities of the Group**

Guardian Holdings Limited (the 'Parent' and ultimate parent) was incorporated in Trinidad and Tobago on 8 November 1982. It is a public limited liability holding company. The address of its registered office is 1 Guardian Drive, Westmoorings S.E., Trinidad and Tobago.

Guardian Holdings Limited and its subsidiaries (the 'Group') constitute a diversified financial services group engaged in underwriting all classes of long-term and short-term insurance business, insurance brokerage operations, the provision of pension and asset management services, and property development. The Group conducts its operations through subsidiaries and associated companies.

The ordinary shares of the Parent are listed on the Trinidad and Tobago Stock Exchange.

#### **2. Significant accounting policies**

The principal accounting policies applied in the preparation of these consolidated financial statements are set out below. These policies have been consistently applied to all the years presented, except as described below.

##### **2.1 Basis of preparation**

These consolidated financial statements are prepared in accordance with International Financial Reporting Standards ('IFRS'). They have been prepared under the historical cost convention, except for the following classes of assets which are stated at fair value in compliance with the relevant IFRS: land and buildings, investment properties and financial assets at fair value through profit or loss or other comprehensive income.

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgment in the process of applying the Group's accounting policies. Areas involving a higher degree of judgment or complexity or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in Note 3.

##### **(a) New standards and amendments/revisions to published standards and interpretations effective in 2018**

The following amendments to published standards and interpretations are mandatory for the Group's accounting periods beginning on or after 1 January 2018:

##### **IFRS 9 Financial Instruments**

IFRS 9 replaces IAS 39 Financial Instruments: Recognition and Measurement and brings together all three aspects of the accounting for financial instruments: classification and measurement, impairment, and hedge accounting.

##### **► *Classification and measurement of financial assets and liabilities***

IFRS 9 contains a new classification and measurement approach for financial assets that reflect the business model in which assets are managed and their cash flow characteristics. Under IFRS 9 entities initially measure a financial asset at its fair value plus, in the case of financial assets not at fair value through profit or loss, transaction cost.

Debt instruments are subsequently measured at fair value through profit or loss (FVPL), amortised cost (AC) or fair value through other comprehensive income (FVOCI). Equity instruments are generally measured at FVPL. However, entities have an irrevocable option, on an instrument-by-instrument basis, to present changes in the fair value of non-trading instruments in other comprehensive income (OCI) without subsequent reclassification to profit or loss.

IFRS 9 also contains requirements for the classification and measurement of financial liabilities. For financial liabilities designated at FVPL, the change in fair value that is attributable to changes in credit risk is presented in OCI and the remaining amount of change in the fair value is presented in profit or loss.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2018  
Expressed in Trinidad and Tobago Dollars  
(Continued)

**2. Significant accounting policies (continued)**

**2.1 Basis of preparation (continued)**

**(a) New standards and amendments/revisions to published standards and interpretations effective in 2018 (continued)**

**IFRS 9 Financial Instruments (continued)**

► ***Impairment***

IFRS 9 replaces the 'incurred loss' model in IAS 39 with a forward-looking 'expected credit loss' (ECL) model. The new impairment model applies to debt instruments measured at AC or FVOCI, most loan commitments, financial guarantee contracts, lease receivables and to contract assets.

Entities are required to recognise 12-month ECL on initial recognition (or when the commitment or guarantee was entered into) and thereafter as long as there is no significant deterioration in credit risk. However, if there has been a significant increase in credit risk on an individual or collective basis, then entities are required to recognise lifetime ECL.

Lifetime ECL is the ECL that result from all possible default events over the expected life of a financial asset, whereas 12-month ECL is the portion of ECL that results from default events that are possible within the 12 months after the reporting date.

For trade receivables, a simplified approach may be applied whereby the lifetime ECL is always recognised on initial recognition.

► ***Hedge accounting***

The general hedge accounting requirements of IFRS 9 retain the three types of hedge accounting mechanisms in IAS 39, that is, fair value hedges, cash flow hedges and net investment hedges. However, greater flexibility has been introduced to the types of transactions eligible for hedge accounting, specifically broadening the types of instruments that qualify as hedging instruments and the types of risk components of non-financial items that are eligible for hedge accounting. In addition, the effectiveness test has been overhauled and replaced with the principle of an 'economic relationship'. Retrospective assessment of hedge effectiveness is no longer required.

The Group has adopted IFRS 9, which resulted in fundamental changes to accounting for its financial assets. Hedge accounting is not applicable to the Group. There are no changes to the Group's classification of nor accounting for financial liabilities.

The changes in accounting and disclosures that resulted from the adoption of IFRS 9 are described in Notes 2.9 and 2.11(a), and the impact of the initial application is disclosed in Note 49.

**IFRS 15 Revenue from Contracts with Customers**

IFRS 15 replaces all previous revenue requirements in IFRS (IAS 11 Construction Contracts, IAS 18 Revenue, IFRIC 13 Customer Loyalty Programmes, IFRIC 15 Agreements for the Construction of Real Estate, IFRIC 18 Transfers of Assets from Customers and SIC 31 Revenue – Barter Transactions Involving Advertising Services) and establishes a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers, unless the contracts are in the scope of other standards. Its requirements also provide a model for the recognition and measurement of gains and losses on disposal of certain non-financial assets, including property, plant and equipment and intangible assets.

## GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2018  
Expressed in Trinidad and Tobago Dollars  
(Continued)

### 2. Significant accounting policies (continued)

#### 2.1 Basis of preparation (continued)

##### (a) New standards and amendments/revisions to published standards and interpretations effective in 2018 (continued)

###### **IFRS 15 Revenue from Contracts with Customers (continued)**

The standard outlines the principles an entity must apply to measure and recognise revenue. The core principle is that an entity will recognise revenue at an amount that reflects the consideration to which the entity expects to be entitled in exchange for transferring goods or services to a customer.

The principles in IFRS 15 must be applied using a five-step model:

1. Identify the contract(s) with a customer
2. Identify the performance obligations in the contract
3. Determine the transaction price
4. Allocate the transaction price to the performance obligations in the contract
5. Recognise revenue when (or as) the entity satisfies a performance obligation

The standard requires entities to exercise judgement, taking into consideration all of the relevant facts and circumstances when applying each step of the model to contracts with their customers. IFRS 15 also specifies how to account for the incremental costs of obtaining a contract and the costs directly related to fulfilling a contract.

IFRS 15 does not have a material impact on the Group's existing accounting policies and did not require retrospective adjustments.

###### **Amendments to IAS 40 Investment Property: Transfers of Investment Property**

The amendments to IAS 40 clarify when an entity should transfer property, including property under construction or development, into or out of investment property. The amendments state that a change in use occurs when the property meets, or ceases to meet, the definition of investment property and there is evidence of the change in use. A mere change in management's intentions for the use of a property does not provide evidence of a change in use.

The amendments had no impact on the Group's consolidated financial statements.

###### **International Financial Reporting Interpretations Committee (IFRIC) 22 Foreign Currency Transactions and Advance Consideration**

IFRIC 22 addresses how to determine the 'date of transaction' for the purpose of determining the exchange rate to use on initial recognition of an asset, expense or income, when consideration for the item has been paid or received in advance in a foreign currency, which resulted in the recognition of a non-monetary asset or a non-monetary liability (e.g. non-refundable deposit or deferred revenue).

The interpretation specifies that the date of the transaction is the date on which an entity initially recognizes the non-monetary asset or non-monetary liability arising from the payment or receipt of advance consideration. If there are multiple payments or receipts in advance, an entity must determine a date of the transactions for each payment or receipt of advance consideration.

The adoption of this interpretation did not have a material impact on the Group.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2018  
Expressed in Trinidad and Tobago Dollars  
(Continued)

**2. Significant accounting policies (continued)**

**2.1 Basis of preparation (continued)**

**(a) New standards and amendments/revisions to published standards and interpretations effective in 2018 (continued)**

**Annual Improvements to IFRSs 2014 - 2016 Cycle**

**Amendments to IAS 28 Investments in Associates and Joint Ventures - Measuring investees at fair value through profit or loss on an investment-by-investment basis**

IAS 28 allow venture capital organizations, mutual funds, unit trusts and similar entities (including investment-linked insurance funds) to elect measuring their investments in joint ventures and associates at fair value through profit or loss. The amendments clarify that this election can be made on an investment-by-investment basis, upon initial recognition.

The amendments also clarify that if an entity that is not itself an investment entity has an interest in an associate or joint venture that is an investment entity, the entity may, when applying the equity method, elect to retain the fair value measurement applied by that investment entity associate or joint venture to the investment entity associate's or joint venture's interests in subsidiaries. This election is made separately for each investment entity associate or joint venture, at the later of the date on which (a) the investment entity associate or joint venture is initially recognised; (b) the associate or joint venture becomes an investment entity; and (c) the investment entity associate or joint venture first becomes a parent.

The amendments had no impact on the Group's consolidated financial statements.

**(b) New standards and amendments/revisions to published standards and interpretations effective in 2018 but not applicable to the Group**

The following new IFRS amendments that have been issued do not apply to the activities of the Group:

- ▶ Amendments to IFRS 2 Share-based Payments: Classification and Measurement of Share-based Payment Transactions
- ▶ Amendments to IFRS 4 Insurance Contracts: Applying IFRS 9 Financial Instruments with IFRS 4 Insurance Contracts
- ▶ Annual Improvements to IFRSs 2014 - 2016 Cycle:
  - ▶ IFRS 1 First-time Adoption of International Financial Reporting Standards: Deletion of short-term exemptions for first-time adopters

## GUARDIAN HOLDINGS LIMITED

### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2018 Expressed in Trinidad and Tobago Dollars (Continued)

#### 2. Significant accounting policies (continued)

##### 2.1 Basis of preparation (continued)

#### (c) New standards, interpretations and revised or amended standards that are not yet effective and have not been early adopted by the Group

The following is a list of new IFRS standards, interpretations and amendments issued that are not yet effective as at 31 December 2018 and have not been early adopted by the Group. For all standards, interpretations and amendments effective 1 January 2019, the Group is currently evaluating the impact, if any, of adoption. It is not expected that they will have a material impact on the consolidated financial statements.

##### Effective 1 January 2019:

- ▶ IFRS 9 Financial Instruments - Amendments - Prepayment Features with Negative Compensation
- ▶ IFRS 10 and IAS 28 - Amendments - Sale or Contribution of Assets between an Investor and its Associate or Joint Venture - In December 2015, the IASB deferred the effective date of the amendments until such time it has finalised any amendments that result from its research project on the equity method of accounting.
- ▶ IFRS 16 Leases
- ▶ IAS 19 Employee Benefits - Amendments - Plan Amendment, Curtailment or Settlement
- ▶ IAS 28 Investment in Associates and Joint Ventures - Amendments - Long-term Interests in Associates and Joint Ventures
- ▶ Annual Improvements to IFRSs 2015 - 2017 Cycle:

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2018  
Expressed in Trinidad and Tobago Dollars  
(Continued)

**2. Significant accounting policies (continued)**

**2.2 Consolidation**

**(a) Subsidiaries**

Subsidiaries are all entities over which the Group has control. Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Specifically, the Group controls an investee if and only if the Group has:

- ▶ Power over the investee (i.e. existing rights that give it the current ability to direct the relevant activities of the investee);
- ▶ Exposure, or rights, to variable returns from its involvement with the investee; and
- ▶ The ability to use its power over the investee to affect its returns.

When the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- ▶ The contractual arrangement with the other vote holders of the investee
- ▶ Rights arising from other contractual arrangements
- ▶ The Group's voting rights and potential voting rights

The Group re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control.

Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Specifically, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated statement of income and other comprehensive income from the date the Group gains control until the date when the Group ceases to control the subsidiary.

Profit or loss and each component of other comprehensive income are attributed to the equity holders of the parent of the Group and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance.

The Group uses the purchase method of accounting for the acquisition of subsidiaries. The cost of an acquisition is measured as the fair value of the assets given, equity instruments issued and liabilities incurred or assumed at the date of exchange, plus costs directly attributable to the acquisition. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date, irrespective of the extent of any non-controlling interest. The excess of the cost of acquisition over the fair value of the Group's share of the identifiable net assets acquired is recorded as goodwill (see Note 2.7). If the cost of acquisition is less than the fair value of the net assets of the subsidiary acquired, the difference is recognised in the consolidated statement of income.

All intra-group transactions and balances are eliminated on consolidation. Subsidiaries' accounting policies have been changed where necessary to ensure consistency with the policies adopted by the Group.

## GUARDIAN HOLDINGS LIMITED

### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2018 Expressed in Trinidad and Tobago Dollars (Continued)

#### **2. Significant accounting policies (continued)**

##### **2.2 Consolidation**

###### **(a) Subsidiaries (continued)**

A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction. If the Group loses control over a subsidiary, it:

- ▶ Derecognises the assets (including goodwill) and liabilities of the subsidiary
- ▶ Derecognises the carrying amount of any non-controlling interests
- ▶ Derecognises the cumulative translation differences recorded in equity
- ▶ Recognises the fair value of the consideration received
- ▶ Recognises the fair value of any investment retained
- ▶ Recognises any surplus or deficit in profit or loss
- ▶ Reclassifies the Parent's share of components previously recognised in other comprehensive income to profit or loss or retained earnings, as appropriate, as would be required if the Group had directly disposed of the related assets or liabilities

A listing of the Group's principal subsidiaries is set out in Note 46.

###### **(b) Associated companies**

The Group's investment in associated companies is accounted for using the equity method of accounting. An associate is an entity in which the Group has significant influence and which is neither a subsidiary nor a joint venture. Significant influence is the power to participate in the financial and operating policy decisions of the investee, but is not control or joint control over those policies.

Under the equity method, the investment in associates is carried in the consolidated statement of financial position at cost plus post-acquisition changes in the Group's share of net assets of the associates. Goodwill relating to associates is included in the carrying amount of the investment and is not amortised. The consolidated statement of income reflects the share of the results of operations of the associates. When there has been a change recognised directly in the equity of the associates, the Group recognises its share of any changes and discloses this, when applicable, in the statement of changes in equity.

The financial statements of the associates are prepared for the same reporting period as the Parent. Where necessary, adjustments are made to bring their accounting policies in line with the Group.

After application of the equity method, the Group determines whether it is necessary to recognise an additional impairment loss on the Group's investment in associates. The Group determines at each consolidated statement of financial position date whether there is any objective evidence that the investment in associates is impaired. If this is the case, the Group calculates the amount of impairment as the difference between the recoverable amount of the associates and its carrying value and recognises the amount in the consolidated statement of income.

The Group discontinues the use of the equity method from the date when the investment ceases to be an associate or when the investment is classified as held for sale.

A listing of the Group's associates is set out in Note 46.

## GUARDIAN HOLDINGS LIMITED

### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2018

Expressed in Trinidad and Tobago Dollars

(Continued)

## **2. Significant accounting policies (continued)**

### **2.2 Consolidation (continued)**

#### **(c) Mutual funds**

The Group manages a series of mutual funds through its trust and asset management subsidiaries, Guardian Group Trust Limited and Guardian Asset Management and Investment Services Limited. These funds invest mainly in equity securities, debt securities and cash and cash equivalents.

As at the consolidated statement of financial position date, the Group has determined that it controls, as defined in note 2.2 (a), specific funds. Similar to the Group's consolidation of its subsidiaries, the assets and liabilities of these funds have been consolidated in the financial statements on a line-by-line basis. The carrying value of the total investments and cash held by the funds are recorded as investment securities of mutual fund unit holders and cash and cash equivalents of mutual fund unit holders respectively on the consolidated statement of financial position. Interests held by external parties in the funds that are consolidated are recorded as third party interest in mutual funds on the consolidated statement of financial position.

### **2.3 Segment reporting**

A business segment is a group of assets and operations engaged in providing products and services that are subject to risks and returns that are different from those of other business segments. For management purposes, the Group is organised into business units based on their products and services and has three main reportable operating segments:

- (i) Life, health and pension;
- (ii) Property and casualty (including insurance brokerage); and
- (iii) Asset management.

All other activities of the Group that do not fall into the segments above are aggregated and reported under 'Other including consolidation adjustments'. These activities include the following: the Group's property development in Martinique, the Group's investment in RGM Limited, the Group's shared services subsidiary and the activities of the Parent.

Transfer prices between operating segments are set on an arm's length basis in a manner similar to those with third parties. Segment income, expenses and results will include those transfers between segments, which will then be eliminated on consolidation.

### **2.4 Foreign currency translation**

#### **(a) Translation of transactions in foreign currencies**

The financial results of Guardian Holdings Limited, its subsidiaries and associates are prepared in the currency in which they conduct their ordinary course of business, which is referred to as functional currency.

Transactions occurring in currencies other than the functional currency are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the consolidated statement of income.

## GUARDIAN HOLDINGS LIMITED

### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2018 Expressed in Trinidad and Tobago Dollars (Continued)

#### 2. Significant accounting policies (continued)

##### 2.4 Foreign currency translation (continued)

###### (b) Translation to the presentation currency

In preparing the consolidated financial statements, the results and financial position of all the Group entities are translated from their respective functional currencies to Trinidad and Tobago dollars, the presentation currency, as follows:

- (i) Assets and liabilities for each consolidated statement of financial position presented are translated at the closing rate at the end of the reporting period;
- (ii) Income and expenses for each consolidated statement of income are translated at average exchange rates; and
- (iii) All resulting exchange differences are recognised as a separate component of equity.

On consolidation, exchange differences arising from the translation of the net investment in foreign entities are taken to the consolidated statement of comprehensive income. When a foreign operation is sold, liquidated or wound up, such exchange differences are recognised in the consolidated statement of income as part of the gain or loss on sale.

##### 2.5 Property, plant and equipment

Freehold properties comprise mainly offices occupied by the Group and are shown at fair value, based on periodic, but at least triennial, valuations by external independent appraisers, less subsequent depreciation for buildings. Any accumulated depreciation at the date of revaluation is eliminated against the gross carrying amount of the asset, and the net amount is restated to the revalued amount of the asset. All other property, plant and equipment are stated at historical cost less accumulated depreciation and accumulated impairment. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. All other repairs and maintenance are charged to the consolidated statement of income during the financial period in which they are incurred.

Increases in the carrying amount arising on revaluation of land and buildings are recognised in the consolidated statement of comprehensive income. Decreases that offset previous increases of the same asset are charged to the consolidated statement of comprehensive income. All other decreases are charged to the consolidated statement of income.

Land is not depreciated. Depreciation on other assets is charged over the estimated useful lives of the assets using the following rates and methods:

|                                                      |                                                                                 |
|------------------------------------------------------|---------------------------------------------------------------------------------|
| Freehold building                                    | - straight-line method, 2% per annum                                            |
| Leasehold property                                   | - over the period of the lease                                                  |
| Air-conditioning equipment                           | - declining balance method, 20% per annum                                       |
| Motor vehicles                                       | - straight-line method, 20% per annum and reducing balance basis, 25% per annum |
| Other plant, machinery, office furniture & equipment | - straight line method, 10 - 40% per annum                                      |

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount (Note 2.11).

## **GUARDIAN HOLDINGS LIMITED**

### **NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2018**

Expressed in Trinidad and Tobago Dollars

(Continued)

#### **2. Significant accounting policies (continued)**

##### **2.5 Property, plant and equipment (continued)**

Gains and losses on disposals are determined by comparing proceeds with carrying amount. These are included in the consolidated statement of income. When revalued assets are sold, the amounts included in the revaluation surplus account are transferred to retained earnings.

##### **2.6 Investment properties**

Freehold or leasehold properties held for long-term rental yields that are not occupied by the Group are classified as investment properties. Investment properties comprise freehold land and buildings. They are measured initially at cost, including transaction costs. Subsequent to initial recognition, investment properties are stated at fair value. Fair value is based on active market prices, adjusted as necessary, for any difference in the nature, location or condition of the specified asset. Fair value is determined annually by external independent appraisers. Investment properties are not subject to depreciation. Any appreciation or diminution in value is recognised in the consolidated statement of income.

If investment properties become owner-occupied, they are reclassified as property, plant and equipment, and their fair value at the date of reclassification becomes its cost for subsequent accounting periods. Alternatively, where properties classified as held for use become investment properties because of a change in use, these properties are accounted for as investment properties and any differences arising between the carrying amount and the fair value of these items at the date of transfer are recognised in the consolidated statement of comprehensive income. However, if a fair value gain reverses a previous impairment loss, the gain is recognised in the consolidated statement of income.

Investment properties are derecognised when either they have been disposed of or when the investment property is permanently withdrawn from use and no future economic benefits are expected from its disposal. Upon disposal, any surplus previously recorded in the property revaluation reserve in equity is transferred to retained earnings.

Properties under construction that are intended for sale, are classified as properties for development and sale. These balances are carried at the lower of cost and net realisable values (Note 2.8).

##### **2.7 Intangible assets**

###### **(a) Goodwill**

Goodwill represents the excess of the cost of an acquisition over the fair value of the Group's share of the net identifiable assets of the acquired subsidiary/associate at the acquisition date. Goodwill on acquisition of subsidiaries is reported in the consolidated statement of financial position. Goodwill on acquisition of associates is included in investments in associates. Goodwill has an indefinite useful life and is tested annually for impairment and carried at cost less accumulated impairment losses. Impairment losses on goodwill are not reversed. Gains and losses on the disposal of an entity include the carrying amount of goodwill relating to the entity sold.

Goodwill is allocated to cash-generating units for the purpose of impairment testing. The allocation is made to those cash-generating units or groups of cash-generating units that are expected to benefit from the business combination in which the goodwill arose.

## GUARDIAN HOLDINGS LIMITED

### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2018

Expressed in Trinidad and Tobago Dollars

(Continued)

#### **2. Significant accounting policies (continued)**

##### **2.7 Intangible assets (continued)**

###### **(b) Customer-related intangibles**

Customer-related intangibles comprise renewal rights and relationships when a business is acquired. They are recognised separately from goodwill and are initially recognised at their fair value at the acquisition date.

Subsequent to initial recognition, customer-related intangibles are carried at cost less accumulated amortisation and accumulated impairment losses. Amortisation is calculated using the straight line method to allocate the intangibles over their useful lives, which range between 7 and 18 years.

###### **(c) Brands**

Brands acquired through direct purchase are carried at cost less accumulated amortisation. Amortisation is calculated using the straight-line method to allocate the cost of brands over their estimated useful lives, which is 11 years.

###### **(d) Computer software and website development costs**

Acquired computer software licenses and website development costs are capitalised on the basis of the costs incurred to acquire and bring to use the specific software. Costs that are directly associated with the development of identifiable and unique software products controlled by the Group, and which will probably generate economic benefits exceeding costs beyond one year, are also recognised as intangible assets. These costs are amortised over their estimated useful lives.

Costs associated with developing or maintaining computer software programmes are recognised as an expense as incurred.

##### **2.8 Properties for development and sale**

Properties for sale or under construction that are intended for sale, are classified as properties for development and sale. These balances are carried at the lower of cost and net realisable values. These properties include offices, retail shops and residential units.

Net realisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and estimated selling expenses. An external valuation specialist was engaged in determining the net realisable value for the office and retail shops, and a discounted cash flow model was used as there is a lack of comparable data because of the nature of the properties. For the residential units, data from binding sales transactions are used to assess the net realisable value.

Impairment losses on properties for development and sale are recognised in the consolidated statement of income when the net realisable value is lower than cost. Subsequently, where cost is less than the net realisable value, a reversal of any prior impairment losses is recognised in the consolidated statement of income. This cannot exceed original cost.

Reclassification to investment properties are made when the Group enters into an operating lease with a third party. Transfers are done at fair value.

## GUARDIAN HOLDINGS LIMITED

### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2018 Expressed in Trinidad and Tobago Dollars (Continued)

#### **2. Significant accounting policies (continued)**

##### **2.9 Financial assets (Policy applicable from 1 January 2018)**

###### **(a) Initial recognition and measurement**

Financial assets are recognised when Group entities become a party to the contractual provisions of the instrument. Regular way purchases and sales of financial assets are recognised on settlement date, the date on which the Group commits to purchase or sell the asset. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.

At initial recognition, the Group measures financial assets at its fair value plus, in the case of financial assets not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition of financial assets. Transaction costs of financial assets carried at fair value through profit or loss are expensed in the consolidated statement of income.

The Group's financial assets include cash and short-term deposits, investment in debt and equity securities, interest receivable, receivables arising from insurance contracts and reinsurance contracts and other loans and receivables.

###### **(b) Classification and subsequent measurement**

###### **Debt instruments**

Subsequent to initial recognition, the Group's debt instruments are measured in accordance with the business models determined by the Group's respective business units for managing the asset and the cash flow characteristics of the asset. There are three measurement categories into which the Group classified its debt instruments:

(i) Amortised cost: Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortised cost. The carrying amounts of these assets are adjusted by any expected credit loss allowance recognised. In addition to certain debt securities, the Group's loans and receivables are carried at amortised cost.

(ii) Fair value through other comprehensive income: Assets that are held for collection of contractual cash flows and for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at fair value through other comprehensive income. Movements in the carrying amount are taken through other comprehensive income except for the recognition of impairment gains or losses, interest revenue and foreign exchange gains and losses which are recognised in profit or loss.

(iii) Fair value through profit or loss: Assets that do not meet the criteria for amortised cost or fair value through other comprehensive income are measured at fair value through profit or loss. A gain or loss on a debt investment that is subsequently measured at fair value through profit or loss is recognised in the consolidated statement of income in the period in which it arises. The Group may, on initial recognition, irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or fair value through other comprehensive income as fair value through profit or loss, if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise. Financial assets held for trading, or are managed and whose performance is evaluated on a fair value basis, are measured at fair value through profit or loss.

The Group reclassifies debt instruments when its business model for managing those assets changes. The reclassification takes place from the start of the first reporting period following the change. Such changes are expected to be infrequent.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2018  
Expressed in Trinidad and Tobago Dollars  
(Continued)

**2. Significant accounting policies (continued)**

**2.9 Financial assets (Policy applicable from 1 January 2018) (continued)**

**(b) Classification and subsequent measurement (continued)**

**Debt instruments (continued)**

*Business model assessment*

The Group's business units determine their business models at the level that best reflects how it manages groups of financial assets to achieve its business objective. Factors considered by the business units in determining the business model for a group of assets include:

- ▶ the stated policies and objectives for the group of assets and the operation of those policies in practice. These include whether management's strategy focuses on earning contractual interest income, maintaining a particular interest rate profile, matching the duration of the financial assets with the duration of any related liabilities or expected cash outflows or realising cash flows through sale of the assets;
- ▶ how performance of the group of assets is evaluated and reported to management;
- ▶ the risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- ▶ how managers of the business are compensated (for example, whether the compensation is based on the fair value of the assets managed or on the contractual cash flows collected);
- ▶ the frequency, volume and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sales activity.

If cash flows after initial recognition are realised in a way that is different from original expectations, the business units do not change the classification of the remaining financial assets held in that business model, but incorporates such information when assessing newly originated or newly purchased financial assets.

*The solely payment of principal and interest (SPPI) test*

'Principal' for the purpose of this test is defined as the fair value of the financial asset at initial recognition and may change over the life of the financial asset (for example, if there are repayments of principal or amortisation of the premium/discount). 'Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and other basic lending risks and costs, as well as a profit margin.

Where the business model is to hold assets and collect contractual cash flows or to collect contractual cash flows and sell, the Group's business units assesses whether the financial assets' cash flows represent solely payments of principal and interest. In making this assessment, the business units considers whether the contractual cash flows are consistent with a basic lending arrangement i.e. the definition of interest. Where the contractual terms introduce exposure to risk or volatility that are inconsistent with a basic lending arrangement, the related financial asset is classified and measured at fair value through profit or loss.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2018  
Expressed in Trinidad and Tobago Dollars  
(Continued)

**2. Significant accounting policies (continued)**

**2.9 Financial assets (Policy applicable from 1 January 2018) (continued)**

**(b) Classification and subsequent measurement (continued)**

**Equity instruments**

Subsequent to initial recognition, the Group measures all equity investments at fair value, and changes in the fair value of equity instruments are recognised in the consolidated statement of income.

**(c) Derecognition of financial assets**

A financial asset (or when applicable, a part of a financial asset or part of a group of similar financial assets) is derecognised when:

- ▶ The rights to receive cash flows from the asset have expired.
- ▶ The Group retains the right to receive cash flows from the asset, but has assumed an obligation to pay them in full without material delay to a third party under a 'pass-through' arrangement.
- ▶ The Group has transferred its rights to receive cash flows from the asset and either:
  - ▶ has transferred substantially all the risk and rewards of the asset, or
  - ▶ has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Group has transferred its right to receive cash flows from an asset and has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the asset is recognised to the extent of the Group's continuing involvement in the asset. Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Group could be required to repay.

On derecognition of a financial asset measured at amortised cost, the difference between the asset's carrying amount and the sum of the consideration received is recognised in the consolidated statement of income. In addition, on derecognition of an investment in a debt instrument classified as at fair value through other comprehensive income, the cumulative gain or loss previously accumulated in the fair value reserve is reclassified to the consolidated statement of income.

**(d) Modifications of financial assets**

If the terms of a financial asset are modified, the Group evaluates whether the cash flows of the modified asset are substantially different from that of the original asset. If the terms are substantially different, the Group derecognises the original financial asset and recognises a new financial asset at fair value. The date of modification is consequently considered to be the date of initial recognition for impairment calculation purposes, including for the purpose of determining whether a significant increase in credit risk has occurred. The Group also assesses whether the new financial asset recognised is deemed to be credit-impaired at initial recognition, especially in circumstances where the modification was driven by the debtor being unable to make the originally agreed payments.

## GUARDIAN HOLDINGS LIMITED

### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2018 Expressed in Trinidad and Tobago Dollars (Continued)

#### **2. Significant accounting policies (continued)**

##### **2.9 Financial assets (Policy applicable from 1 January 2018) (continued)**

###### **(d) Modifications of financial assets (continued)**

If the cash flows of the modified asset are not substantially different, the modification does not result in derecognition of the financial asset. The Group recalculates the gross carrying amount of the financial asset based on revised cash flows, discounted at the original effective interest rate (or credit-adjusted effective interest rate for purchased or originated credit-impaired financial assets), and recognises the amount arising from adjusting the gross carrying amount as a modification gain or loss in the consolidated statement of income.

##### **2.10 Financial assets (Policy applicable prior 1 January 2018)**

###### **(a) Initial recognition and measurement**

Financial assets within the scope of IAS 39 are classified as financial assets at fair value through profit or loss, loans and receivables, or held-to-maturity investments as appropriate. The Group determines the classification of its financial assets at initial recognition. The classification depends on the purpose for which the investments were acquired or originated.

Financial assets are recognised initially at fair value plus, in the case of investments not at fair value through profit or loss, directly attributable transaction costs.

Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the settlement date.

The Group's financial assets include cash and short-term deposits, debt securities, equity securities, interest receivable, receivables arising from insurance contracts and reinsurance contracts and other loans and receivables.

###### **(b) Investment securities at fair value through profit or loss**

Investment securities at fair value through profit or loss include investment securities held-for-trading and those designated at fair value through profit or loss at inception. Investments typically bought with the intention to sell in the near future are classified as held-for-trading. The Group's subsidiaries, with the exception of its asset management company, do not engage in trading investment securities. For investments designated at fair value through profit or loss, the following criteria must be met:

- ▶ The designation eliminates or significantly reduces the inconsistent treatment that would otherwise arise from measuring the assets or liabilities or recognising gains or losses on a different basis; or
- ▶ The assets and liabilities are part of a group of financial assets, financial liabilities or both, which are managed, and their performance evaluated, on a fair value basis in accordance with a documented risk management or investment strategy.

These investments are initially recorded at fair value. Subsequent to initial recognition, these investments are remeasured at fair value. Fair value adjustments and realised gains and losses are recognised in the consolidated statement of income.

## GUARDIAN HOLDINGS LIMITED

### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2018

Expressed in Trinidad and Tobago Dollars

(Continued)

#### **2. Significant accounting policies (continued)**

##### **2.10 Financial assets (Policy applicable prior 1 January 2018) (continued)**

###### **(c) Held-to-maturity investment**

Non-derivative investment securities with fixed or determinable payments and fixed maturities are classified as held-to-maturity when the Group has the positive intention and ability to hold until maturity. These investments are initially recognised at cost, being the fair value of the consideration paid for the acquisition of the investment. All transaction costs directly attributable to the acquisition are also included in the cost of the investment. After initial measurement, held-to-maturity investment securities are measured at amortised cost, using the effective interest rate method. Gains and losses are recognised in the consolidated statement of income when the investments are derecognised or impaired, as well as through the amortisation process.

###### **(d) Loans and receivables**

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. The investments are initially recognised at cost, being the fair value of the consideration paid for the acquisition of the investment. All transaction costs directly attributable to the acquisition are included in the cost of the investment. After initial measurement, loans and receivables are measured at amortised cost, using the effective interest rate method. Gains and losses are recognised in the consolidated statement of income when the investments are derecognised or impaired, as well as through the amortisation process.

###### **(e) Derecognition of financial assets**

A financial asset (or when applicable, a part of a financial asset or part of a group of similar financial assets) is derecognised when:

- ▶ The rights to receive cash flows from the asset have expired.
- ▶ The Group retains the right to receive cash flows from the asset, but has assumed an obligation to pay them in full without material delay to a third party under a 'pass-through' arrangement.
- ▶ The Group has transferred its rights to receive cash flows from the asset and either:
  - ▶ has transferred substantially all the risk and rewards of the asset, or
  - ▶ has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Group has transferred its right to receive cash flows from an asset and has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the asset is recognised to the extent of the Group's continuing involvement in the asset. Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Group could be required to repay.

##### **2.11 Impairment of assets**

###### **(a) Financial assets (Policy applicable from 1 January 2018)**

At each reporting date, the Group assesses, on a forward-looking basis, the expected credit losses (ECL) associated with its financial assets measured at amortised cost and fair value through other comprehensive income (excluding equity instruments).

## GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2018  
Expressed in Trinidad and Tobago Dollars  
(Continued)

### 2. Significant accounting policies (continued)

#### 2.11 Impairment of assets (continued)

##### (a) Financial assets (Policy applicable from 1 January 2018) (continued)

The Group measures loss allowances on its debt instruments at an amount equal to lifetime ECL, except in the following cases, for which the amount recognised is 12-month ECL:

- ▶ Debt securities that are determined to have low credit risk at the reporting date; and
- ▶ Other financial instruments for which credit risk has not increased significantly since initial recognition.

Lifetime ECL are the ECL that result from all possible default events over the expected life of a financial asset, whereas 12-month ECL are the portion of ECL that results from default events that are possible within the 12 months after the reporting date.

For receivables, the Group applies the simplified approach permitted by IFRS 9, which requires expected lifetime losses to be recognised from initial recognition of the receivables.

Loss allowances for ECL are presented in the consolidated financial statements as follows:

- ▶ Financial assets measured at amortised cost: the loss allowance is deducted from the gross carrying amount of the assets in the statement of financial position. Movement in ECL is recognised in the consolidated statement of income.
- ▶ Debt instruments measured at fair value through other comprehensive income: the loss allowance is recognised in the consolidated statement of income with the corresponding entry recognised in other comprehensive income.

##### *Significant increase in credit risk*

In assessing whether the credit risk on a financial instrument has increased significantly since initial recognition, the Group compares the risk of a default occurring as at the reporting date with the risk of default occurring as at the date of initial recognition. In making this assessment, the Group considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort. Forward-looking information considered includes the future prospects of the industries in which the Group's debtors operate, obtained from economic expert reports, financial analysts, governmental bodies and other similar organisations, as well as consideration of various external sources of actual and forecast economic information that relate to the Group's core operations.

The quantitative assessment to identify whether a significant increase in credit risk has occurred for an exposure is performed by comparing:

- ▶ the remaining lifetime probability of default as at the reporting date; with
- ▶ the remaining lifetime probability of default for this point in time that was estimated at the time of initial recognition of the exposure.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2018  
Expressed in Trinidad and Tobago Dollars  
(Continued)

**2. Significant accounting policies (continued)**

**2.11 Impairment of assets (continued)**

**(a) Financial assets (Policy applicable from 1 January 2018) (continued)**

*Significant increase in credit risk (continued)*

The qualitative assessment to identify whether credit risk has increased significantly since initial recognition takes into account the following:

- ▶ Actual or expected significant deterioration in the financial instrument's external (if available) or internal credit rating;
- ▶ Actual or expected significant adverse changes in business, financial or economic conditions that are expected to cause a significant change to the debtor's ability to meet its obligations;
- ▶ Actual or expected significant changes in the operating results of the debtor;
- ▶ Significant increases in credit risk on other financial instruments of the debtor;
- ▶ Significant changes in the expected performance and behaviour of the debtor, including changes in the payment status of debtor;
- ▶ Actual or expected significant adverse change in the regulatory, economic, or technological environment of the debtor that results in a significant change in the debtor's ability to meet its debt obligation.

Irrespective of the outcome of the above assessment, the Group presumes that the credit risk on a financial asset has increased significantly since initial recognition when contractual payments are more than 30 days past due, unless the Group has reasonable and supportable information that demonstrated otherwise.

Despite the aforementioned, the Group assumes that the credit risk on a financial instrument has not increased significantly since initial recognition if the financial instrument is determined to have low credit risk at the reporting date. A financial instrument is determined to have low credit risk if the financial instrument has a low risk of default, the debtor has a strong capacity to meet its contractual cash flow obligations in the near term and adverse changes in economic and business conditions in the longer term may, but will not necessarily, reduce the ability of the debtor to fulfil its contractual cash flow obligations. The Group considers a debt instrument to have low credit risk when its credit risk rating is equivalent to the globally understood definition of 'investment grade'.

*Credit-impaired financial assets*

At each reporting date, the Group assesses whether financial assets carried at amortised cost and debt instruments carried at fair value through comprehensive income are credit-impaired. A financial asset is credit-impaired when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Evidence that a financial asset is credit-impaired includes the following observable data:

- ▶ Significant financial difficulty of the debtor or issuer;
- ▶ A breach of contract, such as a default or past due event;
- ▶ The disappearance of an active market for a financial asset because of financial difficulties;
- ▶ It is becoming probable that the debtor will enter bankruptcy or other financial reorganisation; or
- ▶ Rating agencies' assessments of creditworthiness.

## GUARDIAN HOLDINGS LIMITED

### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2018 Expressed in Trinidad and Tobago Dollars (Continued)

#### **2. Significant accounting policies (continued)**

##### **2.11 Impairment of assets (continued)**

##### **(a) Financial assets (Policy applicable from 1 January 2018) (continued)**

###### *Definition of default*

The Group considers a financial asset to be in default when:

- ▶ the debtor is unlikely to pay its credit obligations to the Group in full, without recourse by the Group to actions such as realising security (if any is held); or
- ▶ the debtor is past due more than 90 days unless the Group has reasonable and supportable information to demonstrate that a more lagging default criterion is more appropriate.

In assessing whether a debtor is in default, the Group considers indicators that are qualitative, quantitative and based on data developed internally and obtained from external sources.

###### *Write-off*

The Group writes off financial assets, either partially or in full, when it has exhausted all practical recovery efforts and has concluded there is no reasonable expectation of recovery. Indicators that there is no reasonable expectation of recovery include ceasing enforcement activity and where the Group's recovery method is foreclosing on collateral and the value of the collateral is such that there is no reasonable expectation of recovering in full.

If the amount to be written off is greater than the accumulated loss allowance, the difference is first treated as an addition to the allowance that is then applied against the gross carrying amount.

###### *Measurement of expected credit losses*

The measurement of expected credit losses is a function of:

- (i) Probability of default - an estimate of the likelihood of default over a given time horizon;
- (ii) Loss given default - an estimate of the loss arising in the case where a default occurs at a given time; and
- (iii) Exposure of default - an estimate of the exposure at a future default date, taking into account expected changes in the exposure after the reporting date, including repayments of principal and interest, whether scheduled by contract or otherwise.

The assessment of the probability of default and loss given default is based on historical data adjusted by forward-looking information. Forward-looking information considered by the Group includes economic data and forecasts published by governmental bodies and monetary authorities, supranational organisations such as the Organization for Economic Cooperation and Development and the International Monetary Fund, and selected private-sector and academic forecasters.

Expected credit losses are measured as the present value of all cash shortfalls i.e. the difference between the cash flows due to the Group in accordance with the contract and the cash flows that the Group expects to receive, discounted at the original effective interest rate.

## GUARDIAN HOLDINGS LIMITED

### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2018 Expressed in Trinidad and Tobago Dollars (Continued)

#### **2. Significant accounting policies (continued)**

##### **2.11 Impairment of assets (continued)**

##### **(a) Financial assets (Policy applicable from 1 January 2018) (continued)**

##### *Measurement of expected credit losses (continued)*

The mechanics of the expected credit losses method are summarised below:

- ▶ A financial instrument that is not credit-impaired on initial recognition, a 12-month ECL allowance is calculated. The Group calculates the 12-month ECL allowance based on the expectation of a default occurring in the twelve months following the reporting date. The expected 12-month default probability is applied to a forecast exposure at default and multiplied by the expected loss given default, and discounted by the original effective interest rate.
- ▶ When a financial instrument has shown a significant increase in credit risk since initial recognition, the Group records an allowance for life-time ECL. The mechanics are similar to 12-month ECL calculation on a financial instrument that is not credit-impaired on initial recognition, but default probability and loss given default are estimated over the life of the instrument.
- ▶ A financial instrument that is credit-impaired, but is not a purchased or originated credit-impaired financial instrument, the Group records an allowance for lifetime ECL calculated similar to lifetime ECL on a financial instrument that has shown a significant increase in credit risk since initial recognition.
- ▶ Purchased or credit-impaired financial assets are assets that are credit-impaired on initial recognition. ECL on these assets are always measured on a lifetime basis, discounted by a credit adjusted effective interest rate.

Where lifetime ECL is measured on a collective basis to cater for cases where evidence of significant increases in credit risk at the individual instrument level may not yet be available, the financial instruments are grouped on the basis of shared risk characteristics that include: instrument type; credit risk ratings; nature, size and industry of debtors; collateral type; and geographic location of the debtor.

If the Group has measured the loss allowance for a financial instrument at an amount equal to lifetime ECL in the previous reporting period, but determines at the current reporting date that the conditions for lifetime ECL are no longer met, the Group measures the loss allowance at an amount equal to 12-month ECL at the current reporting date.

##### **(b) Financial assets carried at amortised cost (Policy applicable prior 1 January 2018)**

If there is objective evidence that an impairment loss on assets carried at amortised cost has been incurred, the amount of the impairment loss is measured as the difference between the asset's carrying amount and the present value of the estimated future cash flows (excluding future expected credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced and the loss is recognised in the consolidated statement of income.

The Group first assesses whether objective evidence of impairment exists individually for financial assets that are individually significant, and individually or collectively for financial assets that are not individually significant. If it is determined that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, the asset is included in a group of financial assets with similar credit risk characteristics and that group of financial assets is collectively assessed for impairment. Assets that are individually assessed for impairment and for which an impairment loss is, or continues to be, recognised are not included in a collective assessment of impairment. The impairment assessment is performed at each consolidated statement of financial position date.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2018  
Expressed in Trinidad and Tobago Dollars  
(Continued)

**2. Significant accounting policies (continued)**

**2.11 Impairment of assets (continued)**

**(b) Financial assets carried at amortised cost (Policy applicable prior 1 January 2018) (continued)**

If in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed. Any subsequent reversal of an impairment loss is recognised in the consolidated statement of income, to the extent that the carrying value of the asset does not exceed its amortised cost at the reversal date.

**(c) Impairment of non-financial assets**

The Group assesses at each reporting date whether there is an indication that an asset may be impaired. If any such indication exists, or when annual impairment testing for an asset is required, the Group estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs to sell and its value in use. The recoverable amount is determined on an individual asset basis, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset or CGU is considered impaired and written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

The Group bases its impairment calculations on detailed budgets and forecast calculations, which are prepared separately for each of the Group's CGUs to which the individual assets are allocated. These budgets and forecast calculations generally cover a period of three years. For longer periods, a long-term growth rate is applied to project future cash flows after the third year.

Impairment losses of continuing operations are recognised in the consolidated statement of income in those expense categories consistent with the function of the impaired asset.

For assets excluding goodwill, an assessment is made at each reporting date as to whether there is any indication that previously recognised impairment losses may no longer exist or may have decreased. If such an indication exists, the Group makes an estimate of the recoverable amount. A previous impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognised. If that is the case, the carrying amount of the asset is increased to its recoverable amount. That increased amount cannot exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the consolidated statement of income unless the asset is carried at the revalued amount, in which case the reversal is treated as a revaluation increase.

Goodwill and intangible assets are tested for impairment annually as at 31 December and when circumstances indicate that the carrying value may be impaired. Impairment is determined for goodwill by assessing the recoverable amount of each CGU (or group of CGUs) to which the goodwill relates. When the recoverable amount of the CGU is less than its carrying amount, an impairment loss is recognised. Impairment losses relating to goodwill cannot be reversed in future periods.

## **2. Significant accounting policies (continued)**

### **2.12 Fair value measurement**

The Group measures financial instruments and non-financial assets at fair value at each statement of financial position date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- ▶ In the principal market for the asset or liability, or
- ▶ In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the Group.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in either its highest and best use, or by selling it to another market participant that would use the asset in its highest and best use.

When one is available, the Group measures the fair value of an instrument using the quoted price in an active market. If there is no quoted price in an active market, the Group establishes fair value by using valuation techniques. These include the use of recent arm's length transactions, reference to other instruments that are substantially the same and discounted cash flow analysis making maximum use of market inputs and relying as little as possible on entity-specific inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- ▶ Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities.
- ▶ Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.
- ▶ Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable. Assets and liabilities, with the exception of freehold and investment properties, included in level 3 are held at cost, being the fair value of the consideration paid on acquisition, and are regularly assessed for impairment. Freehold and investment properties included in level 3 are held at fair value, which is the estimated replacement value.

For assets and liabilities that are recognised in the consolidated financial statements on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

External valuers are involved for valuation of certain assets such as investment properties, freehold and leasehold properties and properties for development and sale. Involvement of external valuers is decided annually and selection criteria include market knowledge, reputation, independence and whether professional standards are maintained.

## GUARDIAN HOLDINGS LIMITED

### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2018

Expressed in Trinidad and Tobago Dollars

(Continued)

#### **2. Significant accounting policies (continued)**

##### **2.13 Offsetting financial instruments**

Financial assets and financial liabilities are offset and the net amount reported in the consolidated statement of financial position only when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the assets and settle the liabilities simultaneously.

##### **2.14 Cash and cash equivalents**

Cash and cash equivalents include cash in hand, deposits held at call with banks, money market placements and other short-term highly liquid investments with original maturities of three months or less, and bank overdrafts. Bank overdrafts, when they arise, are shown within borrowings in current financial liabilities on the consolidated statement of financial position.

Cash and cash equivalents are carried at amortised cost on the consolidated statement of financial position except for cash and cash equivalents allocated to unit-linked insurance contracts, which are carried at fair value through profit or loss.

##### **2.15 Share capital**

Shares are classified as equity when there is no obligation to transfer cash or other assets. Incremental costs directly attributable to the issue of equity instruments are shown in equity as a deduction from the proceeds.

##### **2.16 Insurance and investment contracts**

###### **(a) Classification**

The Group issues contracts that transfer insurance risk or financial risk or both. Insurance contracts are those contracts that transfer significant insurance risk. Such contracts may also transfer financial risk. As a general guideline, the Group defines as significant insurance risk the possibility of having to pay benefits on the occurrence of an insured event that are at least 10% more than the benefits payable if the insured event did not occur.

Investment contracts are those contracts that transfer financial risk with no significant insurance risk.

A number of insurance contracts contain a discretionary participation feature ('DPF'), which entitles the holder to receive, as a supplement to guaranteed benefits, additional benefits or bonuses:

- a) That are likely to be a significant portion of the total contractual benefits;
- b) Whose amount or timing is contractually at the discretion of the Group; and
- c) That are contractually based on:
  - (i) the performance of a specified pool of contracts or a specified type of contract;
  - (ii) realised and/or unrealised investment returns on a specified pool of assets held by the Group; or
  - (iii) the profit or loss of the Group, fund or other entity that issues the contract.

The terms and conditions of these contracts set out the basis for the determination of the amounts on which discretionary benefits are based and within which the Group may exercise its discretion as to the quantum and timing of their payments to contract holders, which will be subject to the advice of the Group's actuary or a locally appointed actuary.

## GUARDIAN HOLDINGS LIMITED

### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2018

Expressed in Trinidad and Tobago Dollars

(Continued)

#### **2. Significant accounting policies (continued)**

##### **2.16 Insurance and investment contracts (continued)**

###### **(b) Recognition and measurement**

Insurance contracts are classified into four main categories, depending on the duration of risk and whether or not the terms and conditions are fixed.

###### **(i) Short-term insurance contracts**

These contracts are principally property, motor, casualty (employers' liability, public liability), marine, group life and health insurance contracts. Health insurance contracts include both group and individual health insurance.

Property insurance contracts indemnify the Group's customers in the event of a loss from a specified insured peril such as fire, windstorm or earthquake up to the insured amount and within the terms of the policy conditions. These contracts are issued for both private and commercial risks.

Motor insurance contracts indemnify the Group's customers for their legal requirement under the respective country's road traffic legislation, which in certain instances stipulate unlimited coverage for third party liability. These contracts may be extended for additional coverage such as physical damage, theft and personal accident.

Casualty insurance contracts provide coverage for liability exposures that indemnify the Group's customers against actions from third parties, which are subject to the policy limits and conditions. The typical protection offered is designed for employers who become legally liable to pay compensation to injured employees (employers' liability) and employers who become liable to pay compensation to third parties for bodily harm or property damage (public liability).

Marine insurance contracts indemnify the Group's customers for loss or damage to their insured cargo, commercial hull and pleasure craft vessels. Third party coverage is also provided.

Group life contracts protect the Group's customers from the consequences of events (such as death or critical illness) that would affect the ability of the customer or his/her dependants to maintain their current level of income. Health insurance contracts provide for both unexpected and preventative medical treatment and drugs. On these contracts, the benefits paid on occurrence of the specified insurance event are either fixed or linked to the extent of the economic loss suffered by the policyholder. There are no maturity or surrender benefits.

For all these contracts, premiums are recognised as revenue (earned premiums) proportionally over the period of coverage. The portion of premiums received on in-force contracts that relate to unexpired risks at the consolidated statement of financial position date is reported as an unearned premium liability. Premiums are shown before deduction of commissions payable to agents and brokers and exclude any taxes or duties levied on such premiums. Premium income includes premiums collected by agents and brokers not yet received by the Group.

Unearned premiums represent the portion of premiums written in the current year that relate to periods of insurance subsequent to the consolidated statement of financial position date, calculated using either the three hundred and sixty-fifths method or the twenty-fourths method. Unearned premiums relating to marine cargo are calculated using 180 days after the first date of sailing. Unearned premiums relating to group life are calculated based on 25% of net premiums written.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2018  
Expressed in Trinidad and Tobago Dollars  
(Continued)

**2. Significant accounting policies (continued)**

**2.16 Insurance and investment contracts (continued)**

**(b) Recognition and measurement (continued)**

**(i) Short-term insurance contracts (continued)**

Claims and loss adjustment expenses are charged to income as incurred based on the estimated liability for compensation owed to contract holders. They arise from events that have occurred up to the consolidated statement of financial position date, even if they have not yet been reported to the Group. The Group does not discount its liabilities for unpaid claims other than for disability claims. Liabilities for unpaid claims are estimated using techniques such as the input of assessments for individual cases reported to the Group and statistical analyses for the claims incurred but not reported ('IBNR'), and to estimate the expected ultimate cost of more complex claims that may be affected by external factors such as court decisions. Estimates are continually revised as more information becomes available and for the effects of anticipated inflation. Adjustments arising on these revisions are recognised within claims expense in the current year.

**(ii) Long-term insurance contracts with fixed and guaranteed terms and without DPF**

These contracts insure events associated with human life over a long duration. Premiums are recognised as revenue when they become payable by the policyholder. Premiums are shown before deduction of commission. Benefits are recorded as an expense when incurred.

A liability for policyholders' benefits that are expected to be incurred in the future is established on acceptance of the insurance risk. The liability is based on the present value of estimated amounts for projected future premiums, claims, benefits, investment income and policy maintenance expenses. The liability is based on key assumptions made with respect to variables such as mortality, persistency, investment returns and expense inflation.

The liabilities are actuarially recalculated at each consolidated statement of financial position date and the change in the liability is recognised as an expense in the consolidated statement of income.

For the Trinidad and Tobago life insurance subsidiaries, actuarial liabilities are calculated using the Caribbean Policyholder Premium Method (CPPM) outlined in draft regulations issued by the Central Bank of Trinidad and Tobago. The Jamaican life insurance subsidiary uses the very similar Policyholder Premium Method as required under the Insurance Act 2001 of Jamaica. The calculations use current best estimates of future cash flows arising from the insurance contracts in force, with additional margins for adverse deviation for each material assumption. As experience unfolds, the resulting provisions for adverse deviations will be included in future income to the extent they are no longer required to cover adverse experience.

For the Dutch Caribbean life insurance subsidiaries, reserves are calculated on a Modified Net Premium Method in accordance with the requirements of the Central Bank of Curacao and St. Maarten and the Central Bank of Aruba.

*Unit-linked and interest-sensitive insurance contracts*

The premiums paid for these contracts contain an element that covers the insured event and another which is used to accumulate cash values available for withdrawal at the option of the policyholder. These cash values earn interest.

## GUARDIAN HOLDINGS LIMITED

### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2018 Expressed in Trinidad and Tobago Dollars (Continued)

#### **2. Significant accounting policies (continued)**

##### **2.16 Insurance and investment contracts (continued)**

##### **(b) Recognition and measurement (continued)**

###### **(ii) Long-term insurance contracts with fixed and guaranteed terms and without DPF (continued)**

###### *Unit-Linked insurance contracts*

For the Jamaican life insurance subsidiary, where the insurance contracts prescribe fixed and guaranteed terms and without DPF, the portion of the premium covering the insured risk is recorded as premium income. The portion of the premium that accumulates a cash value for the policyholder is recorded as a liability and is credited to the account of the policyholder in the respective segregated fund to which the contract is linked.

The liabilities arising from the unit-linked contracts comprise the liability for the insured risk and the accumulated cash value. The liability for the insured risk is determined in a manner identical to the liability for contracts with fixed and guaranteed terms and is included in the policyholders' liability balance, while the liability for the accumulated cash value is carried at fair value of the assets which fund the liabilities. The liabilities for the accumulated cash values are included in the segregated funds' liability balance. The Group bears no risk in relation to segregated funds' liability. The Group does not recognise in its consolidated financial statements the segregated funds' assets and liabilities in these unit-linked contracts.

The change in the liability arising from the insurance risk is recognised as an expense in the consolidated statement of income.

###### *Interest-sensitive insurance contracts*

The Jamaican life insurance subsidiary issues interest-sensitive policies for which the entire premium is recorded as premium income and there is no unbundling of the premium receipt between the insurance and investment components. The liability for the interest-sensitive policies is determined as the sum of the liability for the insured risk (as determined above for unit-linked policies) and the liability for the accumulated cash values. The entire liability for the interest-sensitive policies is recorded in insurance contracts.

The change in the overall liability for the interest-sensitive policies is recognised as an expense in the consolidated statement of income.

###### **(iii) Long-term insurance contracts without fixed terms**

###### *Unit-Linked insurance contracts*

For the Trinidad and Tobago life insurance subsidiary, where the insurance contracts prescribe no fixed terms, the entire premium on these contracts is recorded as premium income. The liabilities held for these contracts are actuarially calculated using the CPPM based on the expected future cash flows from these contracts. Some of the unit-linked annuity contracts contain guarantees that entitle the holders to a minimum guaranteed crediting rate over the life of the policy and provide for minimum annuity purchase rates. These guarantees are allowed for in the liability calculations.

## GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2018  
Expressed in Trinidad and Tobago Dollars  
(Continued)

### **2. Significant accounting policies (continued)**

#### **2.16 Insurance and investment contracts (continued)**

##### **(b) Recognition and measurement (continued)**

###### **(iv) Long-term insurance contracts with fixed and guaranteed terms and with DPF**

In addition to death or life benefits, these contracts contain a DPF that entitles the holders to a bonus or dividend declared from time to time. The discretionary element of the benefits payable under these policies, as well as the guaranteed elements are treated as liabilities. The actuarial calculations make allowance for future expected policyholder bonuses and dividends. Any changes in the total benefits due are recognised as charges in the consolidated statement of income and form part of increases in reserves for future benefits of policyholders.

###### **(v) Investment contracts**

The Group issues investment contracts including deposit administration contracts and individual deferred annuity contracts. Insurance premiums are recognised directly as liabilities. These liabilities are increased by credited interest or change in the unit prices and are decreased by policy administration fees, mortality and surrender charges and any withdrawals. Revenue consists of investment income and interest credited is treated as an expense.

##### **(c) Outstanding claims**

Provision for outstanding claims and the related costs of settlement are based on incidents reported before the end of the financial year and include appropriate provisions for claims incurred but not yet reported. Estimates are continually revised as more information becomes available and for the effects of anticipated inflation. Adjustments arising on these revisions are included with claims expense in the current year.

##### **(d) Policyholders' benefits**

Maturities and annuities are accounted for when due.

Death and disability claims and surrenders are recognised in the consolidated financial statements in the year in which they have been notified.

Differences between the estimated claims and subsequent settlements are recognised in the consolidated statement of income in year of settlement.

##### **(e) Deferred acquisition costs ('DAC')**

Commissions paid to agents and brokers for property, casualty and short-duration life insurance contracts that are related to securing new contracts and renewing existing contracts are expensed over the terms of the policies as premium is earned. All other costs are recognised as expenses when incurred.

##### **(f) Liability adequacy test**

At each consolidated statement of financial position date, the Group assesses whether its recognised insurance liabilities are adequate, using current estimates of future cash flows under its insurance contracts. If that assessment shows that the carrying amount of its insurance liabilities is inadequate, the deficiency is recognised in the consolidated statement of income and the amount of the relevant insurance liabilities is increased.

## GUARDIAN HOLDINGS LIMITED

### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2018

Expressed in Trinidad and Tobago Dollars

(Continued)

#### **2. Significant accounting policies (continued)**

##### **2.16 Insurance and investment contracts (continued)**

###### **(g) Reinsurance contracts held**

Contracts entered into by the Group with reinsurers under which the Group is compensated for losses on one or more contracts issued by the Group and that meet the classification requirements for insurance contracts are classified as reinsurance contracts held.

Contracts that do not meet these classification requirements are classified as financial assets. Insurance contracts entered into by the Group under which the contract holder is another insurer (inward reinsurance) are included with insurance contracts.

The benefits to which the Group is entitled under its reinsurance contracts held are recognised as reinsurance assets. These assets consist of short-term balances due from reinsurers, as well as longer term receivables that are dependent on the expected claims and benefits arising under the related reinsured insurance contracts. Amounts recoverable from or due to reinsurers are measured consistently with the amounts associated with the reinsured insurance contracts and in accordance with the terms of each reinsurance contract. Reinsurance liabilities are primarily premiums payable for reinsurance contracts and amounts advanced by reinsurers to settle claims arising from catastrophic events.

The Group assesses its reinsurance assets for impairment on a quarterly basis. If there is objective evidence that the reinsurance asset is impaired, the Group reduces the carrying amount of the reinsurance asset to its recoverable amount and recognises that impairment loss in the consolidated statement of income.

###### **(h) Receivables and payables related to insurance contracts and investment contracts**

Receivables and payables are recognised when due. These include amounts due to and from agents, brokers and insurance contract holders. If there is objective evidence that the insurance receivable is impaired, the Group reduces the carrying amount of the insurance receivable accordingly and recognises that impairment loss in the consolidated statement of income.

###### **(i) Salvage and subrogation reimbursements**

Some insurance contracts permit the Group to sell (usually damaged) property acquired in settling a claim (salvage). The Group may also have the right to pursue third parties for payment of some or all costs (subrogation). The estimated cost of claims includes a deduction for the expected value of salvage and other recoveries.

##### **2.17 Borrowings**

Borrowings are recognised initially at fair value, plus directly attributable transaction costs. After initial recognition, interest-bearing loans are subsequently measured at amortised cost using the effective interest rate (EIR) method. Gains and losses are recognised in the consolidated statement of income when the liabilities are derecognised as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance costs in the consolidated statement of income.

Borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset (i.e. an asset that necessarily takes a substantial period of time to get ready for its intended use or sale) are capitalised.

### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2018

Expressed in Trinidad and Tobago Dollars

(Continued)

## 2. Significant accounting policies (continued)

### 2.18 Taxation

Taxation in the consolidated statement of income comprises current and deferred income tax.

Current income tax charges are based on taxable profits for the year, which differ from the profit before tax reported because it excludes items that are taxable or deductible in other years, and items that are never taxable or deductible. The Group's liability for current tax is calculated at tax rates that have been enacted or substantively enacted at the date of the consolidated statement of financial position.

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. Currently enacted or substantively enacted tax rates are used in the determination of deferred income tax.

Deferred tax assets are recognised to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised.

Deferred tax is charged or credited to the consolidated statement of income, except where it relates to items charged or credited to the consolidated statement of comprehensive income, in which case, deferred tax is also dealt with in the consolidated statement of comprehensive income.

### 2.19 Employee benefits

#### (a) Pension plans

The Group operates a number of defined benefit and defined contribution plans, the assets of which are held in separate trustee-administered funds. The plans are generally funded by payments from employees and by the relevant Group companies after taking account of the recommendations of the external qualified actuaries.

The plans are governed by trust/fund deeds and rules and are administered in accordance with the laws of the jurisdiction in which the plan resides. Responsibility for the governance of the plans, including investment strategies, lies with the Board of Trustees/Foundation.

A defined benefit plan is a pension plan that defines an amount of pension benefit that an employee will receive on retirement, usually dependent on one or more factors such as age, years of service and compensation. A defined contribution plan is a pension plan under which the Group pays fixed contributions into a separate entity. The Group has no legal or constructive obligations to pay further contributions if the fund does not hold sufficient assets to pay all employees the benefits relating to employee service in the current or prior periods.

The asset or liability recognised in the consolidated statement of financial position in respect of defined benefit pension plans is the present value of the defined benefit obligation at the consolidated statement of financial position date less the fair value of plan assets. Plan assets exclude any insurance contracts issued by the Group.

For defined benefit plans, the pension accounting costs are assessed using the projected unit credit method. Under this method, the cost of providing pensions is charged to the consolidated statement of income so as to spread the regular cost over the service lives of employees in accordance with the advice of a qualified actuary, who carries out full valuations of the plans every three years. The pension obligation is measured as the present value of the estimated future cash outflows using interest rates of government securities which have terms to maturity approximating the terms of the related liability. Remeasurements of the net defined benefit liability, which comprise actuarial gains and losses and the return on plan assets (excluding interest), are recognised immediately through other comprehensive income in the consolidated statement of comprehensive income.

## GUARDIAN HOLDINGS LIMITED

### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2018 Expressed in Trinidad and Tobago Dollars (Continued)

#### **2. Significant accounting policies (continued)**

##### **2.19 Employee benefits (continued)**

###### **(a) Pension plans (continued)**

The defined benefit plans mainly expose the Group to actuarial risks such as investment risk, interest rate risk and longevity risk.

The Group's contributions to the defined contribution pension plans are charged to the consolidated statement of income in the year to which they relate.

###### **(b) Post-retirement medical benefit obligations**

The Group's subsidiaries in Trinidad and Tobago and the Dutch Caribbean provide post-retirement medical benefits to its permanent employees who retire from active service, their spouses and their dependents. The entitlement to these benefits is based on the employee remaining in service up to retirement age or leaving service due to ill health. The expected costs of these benefits are accrued over the period of employment, using a methodology similar to that for defined benefit plans. All actuarial gains and losses are recognised immediately through other comprehensive income in the consolidated statement of comprehensive income. External qualified actuaries carry out a valuation of these obligations.

###### **(c) Long-term performance incentive plan**

The Group operates a cash-based long-term performance incentive plan for eligible executives. Accruals are made annually based on the ultimate expected payments to eligible executives.

###### **(d) Employee share ownership plan ('ESOP')**

The employees of subsidiaries incorporated in Trinidad and Tobago have the option to receive their bonuses in cash and/or ordinary shares of the parent company purchased on the open market, in accordance with the terms outlined in the Trust Deed governing an approved ESOP. The Group recognises an expense within staff costs when bonuses are awarded.

###### **(e) Bonus plans**

The Group recognises a liability and an expense for bonuses based on a formula that takes into consideration the profit attributable to the Group's shareholders after certain adjustments. The Group recognises a provision where contractually obligated or where there is a past practice that has created a constructive obligation.

##### **2.20 Provisions**

Provisions are made when the Group has a present legal or constructive obligation as a result of past events, for which it is more likely than not that an outflow of resources will be required to settle the obligation, and the amount has been reliably estimated. Provisions are not recognised for future operating losses. Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognised even if the likelihood of an outflow with respect to any one item included in the same class of obligations is small.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2018  
Expressed in Trinidad and Tobago Dollars  
(Continued)

**2. Significant accounting policies (continued)**

**2.21 Revenue recognition**

Revenue comprises the fair value for services rendered after eliminating revenue within the Group. Revenue is recognised as follows:

**(a) Premium income**

Premium income is recognised on the accrual basis in accordance with the terms of the underlying contracts as outlined in Note 2.16.

**(b) Investment income**

Interest income is recognised using the effective interest method. Interest income is calculated by applying the effective interest rate method to the gross carrying amount of financial assets, except for:

- ▶ Purchased or originated credit-impaired financial assets, for which the credit-adjusted effective interest rate is applied to the amortised cost of the financial asset.
- ▶ Financial assets that are not purchased or originated credit-impaired but have subsequently become credit-impaired, for which interest revenue is calculated by applying the effective interest rate to their amortised cost i.e. net of the expected credit loss provision.

Dividend income is recognised when the right to receive payment is established.

**(c) Rental income**

Rental income is recognised on an accrual basis.

**(d) Realised and unrealised investment gains and losses**

Realised and unrealised gains and losses on investments measured at amortised cost or fair value through profit or loss are recognised in the consolidated statement of income in the period in which they arise.

Unrealised gains and losses on investment securities measured at fair value through other comprehensive income are recognised in other comprehensive income. On derecognition, debt securities gains and losses accumulated in other comprehensive income are reclassified to the consolidated statement of income.

**(e) Commission income**

Commissions are recognised on the accrual basis.

**(f) Fee income**

Fees are earned from the management of the assets of the segregated funds and deposit administration funds and from general policy administration and surrenders. Fees are recognised in the period in which the services are rendered.

For the asset management companies in the Group, portfolio, asset management fees and other management advisory and service fees are recognised based on the applicable service contracts over the period in which the service is provided. Management fees and commissions arising from negotiating, or participating in the negotiation of a transaction for a third party are recognised on completion of the underlying transaction.

## GUARDIAN HOLDINGS LIMITED

### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2018

Expressed in Trinidad and Tobago Dollars

(Continued)

#### **2. Significant accounting policies (continued)**

##### **2.22 Leases**

Leases in which a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating leases. Payments made under operating leases are charged to the consolidated statement of income on a straight-line basis over the period of the lease.

##### **2.23 Dividend distributions**

Dividend distributions to the Parent's shareholders are recognised as an appropriation in the Group's consolidated financial statements in the period in which the dividends are approved by the Group's Board of Directors.

##### **2.24 Finance charges**

Finance charges are recognised as an expense in the period in which they are incurred except to the extent that they are capitalised when directly attributable to the acquisition, construction or production of an investment property or in developing properties for sale.

##### **2.25 Earnings per share**

Basic earnings per share is calculated by dividing profit or loss attributable to ordinary equity holders of the parent entity by the weighted average number of ordinary shares outstanding during the period.

##### **2.26 Assets under management**

The Group provides custody and trustee discretionary investment management services to third parties. Such assets under management represent the managed funds administered by the Trust company.

##### **2.27 Subscriptions and redemptions on mutual funds portfolio**

(a) Subscriptions - Units relating to the various pools of mutual funds consolidated in the Group's financial statements could be subscribed based on the net asset value per unit of the underlying funds determined on each business day.

(b) Distributions - The net income and net realised capital gains of the various pools of mutual funds are calculated and accrued to the investor daily and distributed monthly. Investors have the option either to receive a cash distribution or to reinvest income distributions into units at the prevailing subscription price as at the date of distribution.

(c) Redemptions - Units relating to the various pools of mutual funds consolidated in the Group's financial statements are redeemed at a price per unit based on the net asset value of the underlying funds published on the date that the request is made.

##### **2.28 Comparative information**

Where necessary, comparative data have been adjusted to conform to the presentation in the current year.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2018  
Expressed in Trinidad and Tobago Dollars  
(Continued)

**3. Critical accounting estimates and judgments in applying accounting policies**

The Group makes estimates and assumptions that may affect the reported amounts of assets and liabilities during the succeeding financial year. Estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

**(a) The ultimate liability arising from claims made under insurance contracts**

The estimation of the ultimate liability arising from claims made under insurance contracts is an important accounting estimate. There are several sources of uncertainty that need to be considered in the estimate of the liability that the Group will ultimately pay for such claims, in particular, for claims arising from motor, casualty and health insurance contracts. At 31 December 2018, the carrying amount of short-term insurance contracts (claims) was \$1.7 billion (2017: \$2.5 billion).

**(b) Estimate of future benefit payments and premiums arising from long-term insurance contracts**

The determination of the liabilities under long-term insurance contracts is dependent on estimates made by the Group. Uncertainty in the estimation of future benefit payments and premium receipts for long-term insurance contracts arises from the unpredictability of long-term changes in overall levels of future mortality, morbidity, administrative expenses, investment income and the variability in contract holder behaviour. Estimates are made as to the expected number of deaths, voluntary terminations and other events giving rise to cash flows for each of the years in which the Group is exposed to risk. The Group bases these estimates on standard actuarial tables adjusted where appropriate to reflect the Group's own experience or expectations. Although the pattern of future cash flows may be close to that indicated by past experience, some deviation in that pattern is probable.

The estimated number of deaths determines the value of the benefit payments. The main source of uncertainty is that epidemics and wide-ranging lifestyle changes, such as in eating, smoking and exercise habits, could result in future mortality being significantly worse than in the past for the age groups in which the Group has significant exposure to mortality risk. However, continuing improvements in medical care and social conditions may result in improvements in longevity in excess of those allowed for in the estimates used to determine the liability for contracts where the Group is exposed to longevity risk.

Estimates are also made as to future investment income arising from the assets backing long-term insurance contracts. These estimates are based on historic yield patterns and current market returns as well as expectations about future economic and financial developments. See Note 4.1.4(d) for the sensitivity of the value of insurance liabilities to changes in assumptions used to value these liabilities.

The carrying amount of long-term insurance contracts as at 31 December 2018 was \$14.4 billion (2017: \$13.8 billion).

(Continued)

### 3. Critical accounting estimates and judgments in applying accounting policies (continued)

#### (c) Business model assessment

Classification and measurement of financial assets depends on the results of the SPPI and the business model test. The Group determines the business model at a level that reflects how groups of financial assets are managed together to achieve a particular business objective. This assessment includes judgment reflecting all relevant evidence including how the performance of the assets is evaluated and their performance measured, the risks that affect the performance of the assets and how these are managed and how the managers of the assets are compensated. The Group monitors financial assets measured at amortised cost or fair value through other comprehensive income that are derecognised prior to their maturity to understand the reason for their disposal and whether the reasons are consistent with the objective of the business for which the asset was held. Monitoring is part of the Group's continuous assessment of whether the business model for which the remaining financial assets are held continues to be appropriate and if it is not appropriate whether there has been a change in business model and so a prospective change to the classification of those assets. Factors considered by the Group's business units in determining the business model for a group of assets are disclosed in Note 2.9(b).

#### (d) Fair valuation of financial assets

The fair value of financial assets that are not traded in an active market is determined by using an internally developed bond valuation model. Assumptions used in this model are validated and periodically reviewed internally by qualified personnel. Where applicable, data is calibrated to ensure that outputs reflect actual data and comparative market prices. Changes in assumptions used in valuations could affect reported fair value of financial assets. Key assumptions are based on current market yields. At 31 December 2018, the carrying amount of financial assets that were fair valued using an internally developed bond valuation model was \$6.6 billion (2017: \$4.1 billion). The following table shows the effect on the profit or loss and fair value reserve to changes in the market yields.

|                                                 | Effect on<br>fair value reserve |        | Effect on<br>consolidated income |        | Effect on<br>consolidated income |        |
|-------------------------------------------------|---------------------------------|--------|----------------------------------|--------|----------------------------------|--------|
|                                                 | 2018                            |        | 2018                             |        | 2017                             |        |
|                                                 | \$'000                          | \$'000 | \$'000                           | \$'000 | \$'000                           | \$'000 |
| <b>For the Trinidadian subsidiaries:</b>        |                                 |        |                                  |        |                                  |        |
| Decrease/(increase) in market yields (+ / - 1%) | (28,010)                        | 28,010 | (11,105)                         | 11,694 | (43,197)                         | 43,856 |

| Decrease/(increase) in market yields (+ / - 1%) | (72,509)                        | 72,509 | —                                | —      | (67,953)                         | 67,953 |

#### (e) Impairment losses on financial assets

The measurement of expected credit loss allowance for financial assets measured at amortised cost and fair value through other comprehensive income requires judgement, in particular, the estimation of the amount and timing of future cash flows and collateral values when determining impairment losses and the assessment of a significant increase in credit risk. These estimates are driven by a number of factors, changes in which can result in different levels of allowances.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2018  
Expressed in Trinidad and Tobago Dollars  
(Continued)

**3. Critical accounting estimates and judgments in applying accounting policies (continued)**

**(e) Impairment losses on financial assets (continued)**

The Group's expected credit loss calculations are outputs of models with a number of underlying assumptions regarding the choice of variable inputs and their interdependencies. Elements of the expected credit loss models that are considered accounting judgements and estimates include:

- ▶ The Group's criteria for assessing if there has been a significant increase in credit risk and so allowances for financial assets should be measured on a lifetime expected credit loss basis and the qualitative assessment
- ▶ The segmentation of financial assets when their ECL is assessed on a collective basis
- ▶ Development of ECL models, including the various formulas and the choice of inputs
- ▶ Selection of forward-looking macroeconomic scenarios to derive the economic inputs into the expected credit loss models
- ▶ Determination of associations between macroeconomic scenarios and, economic inputs and the effect on probabilities of default, exposure at default and loss given default

The Group regularly reviews its internal models in the context of actual loss experience and adjusts when necessary. The carrying amounts of expected credit loss allowance on financial assets are disclosed in Note 4.2.3(e).

**(f) Impairment losses on loans and receivables (Critical accounting estimates and judgment prior 1 January 2018)**

Prior to 1 January 2018 the Group followed the IAS 39 guidelines. The Group reviewed its asset portfolios to assess impairment on a periodic basis. In determining whether an impairment loss should be recognised in the consolidated statement of income, the Group made judgments as to whether there is any observable data indicating that there is a measurable decrease in the estimated future cash flows from the underlying portfolios. The methodology and assumptions used for estimating both the amount and timing of future cash flows were reviewed regularly to reduce any differences between loss estimates and actual loss experience.

The carrying amount of impairment provisions on loans and receivables as at 31 December 2017 was \$123 million.

**(g) Taxation**

The Group is subject to income taxes in numerous jurisdictions. Estimates are required in determining the provision for income taxes. There are many transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. The Group recognises liabilities for anticipated tax audit issues based on estimates of whether additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the income tax and deferred tax provisions in the period in which such determination is made.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2018  
Expressed in Trinidad and Tobago Dollars  
(Continued)

**3. Critical accounting estimates and judgments in applying accounting policies (continued)**

**(h) Held-to-maturity investments (Critical accounting estimates and judgment prior 1 January 2018)**

Prior to 1 January 2018 the Group followed the IAS 39 guideline on classifying non-derivative financial assets with fixed or determinable payments and fixed maturity dates as held-to-maturity. This classification required significant judgment. In making this judgment, the Group evaluated its intention and ability to hold such investments to maturity. If the Group failed to keep these investments to maturity other than for specific circumstances, for example, selling an insignificant amount close to maturity, it would be required to reclassify the entire category. The investments would therefore be measured at fair value, not at amortised cost. The carrying amount of held-to-maturity investments as at 31 December 2017 was \$9.2 billion. If the entire class of held-to-maturity investments was tainted, the carrying value would have increased by \$634 million as at 31 December 2017 with a corresponding entry in consolidated statement of income.

**(i) Impairment of non-financial assets**

An impairment exists when the carrying value of an asset or cash-generating unit exceeds its recoverable amount, which is the higher of its fair value less costs to sell and its value in use. The fair value less costs to sell calculation is based on available data from binding sales transactions in an arm's length transaction of similar assets or observable market prices less incremental costs for disposing of the asset. The value in use calculation is based on a discounted cash flow model. The cash flows are derived from approved budgets and do not include restructuring activities that the Group is not yet committed to or significant future investments that will enhance the asset's performance of the cash-generating unit being tested. The recoverable amount is most sensitive to the discount rate used for the discounted cash flow model as well as the expected future cash-inflows and the growth rate used for extrapolation purposes. The carrying amount of impairment provisions on non-financial assets as at 31 December 2018 was \$88 million (2017: \$97 million).

**(j) Post-employment benefits**

In conducting valuation exercises to measure the effect of all post-employment benefit plans throughout the Group, the Group's external actuaries use judgment and assumptions in determining discount rates, salary increases, pension increases and health care costs. These assumptions are detailed in Note 12 and Note 24.

#### **4. Management of Insurance and Financial Risk**

The Group issues contracts that transfer insurance risk or financial risk or both. This section summarises these risks and the way the Group manages them.

##### **4.1 Insurance risk**

The risk under any one insurance contract is the possibility that the insured event occurs and the uncertainty of the amount of the resulting claim. By the very nature of an insurance contract, this risk is random and therefore unpredictable.

For a portfolio of insurance contracts where the theory of probability is applied to pricing and provisioning, the principal risk that the Group faces under its insurance contracts is that the actual claims and benefit payments exceed the carrying amount of the insurance liabilities. This could occur because the frequency or severity of claims and benefits are greater than estimated. Insurance events are random and the actual number and amount of claims and benefits will vary from year to year from the level established using statistical techniques.

Experience shows that the larger the portfolio of similar insurance contracts, the smaller the relative variability about the expected outcome will be. In addition, a more diversified portfolio is less likely to be affected across the board by a change in any subset of the portfolio. The Group has developed its insurance underwriting strategy to diversify the type of insurance risks accepted and within each of these categories to achieve a sufficiently large population of risks to reduce the variability of the expected outcome.

Factors that aggravate insurance risk include lack of risk diversification in terms of type and amount of risk, geographical location and type of industry covered.

##### **4.1.1 Casualty insurance risks**

###### **(a) Frequency and severity of claims**

The frequency and severity of claims can be affected by several factors. The Group manages these risks through its underwriting strategy, adequate reinsurance arrangements and proactive claims handling.

The underwriting strategy attempts to ensure that the underwritten risks are well diversified in terms of type and amount of risk, industry and geography.

Underwriting limits are in place to enforce appropriate risk selection criteria. For example, the Group has the right not to renew individual policies, it can impose deductibles and it has the right to reject the payment of a fraudulent claim. Insurance contracts also entitle the Group to pursue third parties for payment of some or all costs (subrogation).

The Group's reinsurance arrangements include non-proportional excess of loss placements on a per claimant and a per occurrence basis.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2018  
Expressed in Trinidad and Tobago Dollars  
(Continued)

**4. Management of Insurance and Financial Risk (continued)**

**4.1 Insurance risk (continued)**

**4.1.1 Casualty insurance risks (continued)**

**(b) Sources of uncertainty in the estimation of future claim payments**

Claims on casualty contracts are payable on a claims-occurrence basis. The Group is liable for all insured events that occurred during the term of the contract, even if the loss is discovered after the end of the contract term. As a result, liability claims are settled over a long period of time and a large element of the claims provision relates to claims incurred but not reported (IBNR). There are several variables that affect the amount and timing of cash flows from these contracts. These mainly relate to the inherent risks of the business activities carried out by individual contract holders and the risk management procedures they adopted. The compensation paid on these contracts is the monetary awards granted for bodily injury suffered by employees (for employer's liability cover) or members of the public (for public liability cover). Such awards are lump-sum payments that are calculated as the present value of the lost earnings and rehabilitation expenses that the injured party will incur as a result of the accident.

The estimated cost of claims includes direct expenses to be incurred in settling claims. The Group takes all reasonable steps to ensure that it has appropriate information regarding its claims exposures. However, given the uncertainty in establishing claims provisions, it is likely that the final outcome will prove to be different from the original liability established. The liability for these contracts comprises a provision for IBNR and a provision for reported claims not yet paid at the consolidated statement of financial position date.

In calculating the estimated cost of unpaid claims (both reported and IBNR), the Group's estimation techniques are a combination of loss-ratio-based estimates (where the loss ratio is defined as the ratio between the ultimate cost of insurance claims and insurance premiums earned in a particular financial year in relation to such claims) and an estimate based upon actual claims experience using predetermined formulae where greater weight is given to actual claims experience as time passes.

The initial loss-ratio estimate is an important assumption in the estimation technique and is based on previous years' experience, adjusted for factors such as premium rate changes, anticipated market experience and historical claims inflation.

The estimation of IBNR is generally subject to a greater degree of uncertainty than the estimation of the cost of settling claims already notified to the Group, where information about the claim event is available. IBNR claims may not be apparent to the insurer until many years after the event that gave rise to the claims has happened. For casualty contracts, the IBNR proportion of the total liability is high and will typically display greater variability between initial estimates and final outcomes because of the greater degree of difficulty of estimating these liabilities.

In estimating the liability for the cost of reported claims not yet paid, the Group considers any information available from loss adjusters and information on the cost of settling claims with similar characteristics in previous periods. Large claims are assessed on a case-by-case basis or projected separately in order to allow for the possible distortive effect of their development and incidence on the rest of the portfolio.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2018  
Expressed in Trinidad and Tobago Dollars  
(Continued)

**4. Management of Insurance and Financial Risk (continued)**

**4.1 Insurance risk (continued)**

**4.1.1 Casualty insurance risks (continued)**

**(b) Sources of uncertainty in the estimation of future claim payments (continued)**

Where possible, the Group adopts multiple techniques to estimate the required level of provisions. This provides a greater understanding of the trends inherent in the experience being projected. The projections given by the various methodologies also assist in estimating the range of possible outcomes. The most appropriate estimation technique is selected taking into account the characteristics of the business class and the extent of the development of each accident year.

Note 20.2 presents the development of the estimate of ultimate claim cost for claims notified in a given year. This gives an indication of the accuracy of the Group's estimation technique for claims payments.

**4.1.2 Short duration life insurance contracts**

**(a) Frequency and severity of claims**

Short-duration life insurance contracts are contracts that are typically of a short tenure, with the tenure being often determined by the length of an individual's time in employment. These contracts are mainly issued to employers to insure their commitments to their employees. The risk is affected by the nature of the industry in which the employer operates. The risk of death and disability will vary by industry.

The Group attempts to manage this risk through its underwriting and claims handling. Additionally, there is reinsurance on short-duration life insurance contracts.

**b) Sources of uncertainty in the estimation of future claim**

There is no need to estimate mortality rates or morbidity rates for future years because these contracts have short duration. However, for incurred disability income claims, it is necessary to estimate the rates of recovery from disability for future years. The Group currently does so using conservative assumptions.

**(c) Changes in assumptions**

The Group's assumptions in respect of short duration life insurance contracts have not significantly changed from the prior year.

**4.1.3 Property insurance contracts**

**(a) Frequency and severity of claims**

For property insurance contracts, climatic changes give rise to more frequent and severe extreme weather events (for example, flooding and hurricanes) and their consequences (for example, subsidence claims). For certain contracts, the Group has also limited the number of claims that can be paid in any policy year or introduced a maximum amount payable for claims in any policy year.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2018  
Expressed in Trinidad and Tobago Dollars  
(Continued)

**4. Management of Insurance and Financial Risk (continued)**

**4.1 Insurance risk (continued)**

**4.1.3 Property insurance contracts (continued)**

**(a) Frequency and severity of claims (continued)**

The Group has the right to re-price the risk on renewal. It also has the ability to impose deductibles and reject fraudulent claims. These contracts are underwritten by reference to the commercial replacement value of the properties and contents insured, and claims payment limits are always included to cap the amount payable on occurrence of the insured event. The cost of rebuilding properties, of replacement or indemnity for contents and the time taken to restart operations for business interruption are the key factors that influence the level of claims under these policies. The greatest likelihood of significant losses on these contracts arises from storm or flood damage. The Group analyses the property exposures using in-house and external modelling tools and purchases sufficient reinsurance protection to cover its perceived liabilities.

The Group's reinsurance arrangements include proportional quota share and surplus arrangements and non-proportional excess of loss placements on a per claimant and a per occurrence basis.

**b) Sources of uncertainty in the estimation of future claim**

Property claims are analysed separately for subsidence and non-subsidence claims. The development of large losses/catastrophes is analysed separately. Non-subsidence claims can be estimated with greater reliability, and the Group's estimation processes reflect all the factors that influence the amount and timing of cash flows from these contracts. The shorter settlement period for these claims allows the Group to achieve a higher degree of certainty about the estimated cost of claims and relatively little IBNR is held at year end. The longer time needed to assess the emergence of a subsidence claim makes the estimation process more uncertain.

**4.1.4 Long-term insurance contracts**

**(a) Frequency and severity of claims**

For contracts where death is the insured risk, the most significant factors that could increase the overall frequency of claims are epidemics or widespread changes in lifestyle, such as in eating, smoking and exercise habits, resulting in earlier or more claims than expected. For contracts where survival is the insured risk, the most significant factor is continued improvement in medical science and social conditions that would increase longevity.

At present, these risks do not vary significantly in relation to the location of the risk insured by the Group. However, undue concentration could have an impact on the severity of benefit payments on a portfolio basis.

For contracts with fixed and guaranteed terms, there are no mitigating terms and conditions that reduce the insurance risk accepted. For contracts without fixed terms, a significant portion of the insurance risk is shared with the insured party. The Group charges for mortality risk on a monthly basis for most life and critical insurance contracts without fixed terms. It has the right to alter these charges based on its mortality experience and hence minimise its exposure to mortality risk.

The Group manages these risks through its underwriting strategy and reinsurance arrangements. Medical selection is included in the Group's underwriting procedures with premiums varied to reflect the health condition and family medical history of the applicants. The Group uses excess of loss reinsurance contracts with retention limits that vary by product.

The following tables for annuity insurance contracts illustrate the concentration of risk based on five bands that group these contracts in relation to the amount payable per annum, as if the annuity were in payment at the year end. The Group does not hold any reinsurance contracts against the liabilities carried for these contracts.

Insurance risk for contracts disclosed in this note is also affected by the contract holders' right to pay reduced or no future premiums, to terminate the contract completely, or to exercise a guaranteed annuity option. As a result, the amount of insurance risk is also subject to contract holder behaviour.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2018  
Expressed in Trinidad and Tobago Dollars  
(Continued)

**4. Management of Insurance and Financial Risk (continued)**

**4.1 Insurance risk (continued)**

**4.1.4 Long-term insurance contracts (continued)**

**(b) Process used to decide on assumptions**

For long-term insurance contracts, the Group determines assumptions in relation to future deaths and other benefits, voluntary termination, investment returns, administrative expenses and other items that are appropriate to the policies, their location and the local statutory reserving requirements. In the case of Jamaica and Trinidad and Tobago, the assumptions are best estimate assumptions with appropriate provisions for adverse deviations, consistent with the use of a Policy Premium Method valuation. For other territories, the assumptions used are those appropriate for traditional net premium valuation methods.

The nature and method of determining the significant assumptions made by the Group in the computation of policyholders' liabilities are described in the following paragraphs.

● **Mortality & morbidity**

An appropriate base table of standard mortality or morbidity is chosen depending on the type of contract. Supplemental information, such as reinsurance rates, is used where standard tables are not available. An investigation into the Group's experience in recent years is performed, and the standard actuarial tables are adjusted where appropriate to reflect the Group's own experience or expectations. For contracts that insure the risk of longevity, appropriate but not excessively prudent allowance is made for expected mortality improvements.

● **Voluntary terminations and persistency**

Estimates of the amounts and timings of future benefit and premium payments are based on Group experience over extended periods. Voluntary termination and variable premium assumptions vary by product type and policy duration.

● **Investment returns**

The computation of policyholders' liabilities takes into account projected net investment income on assets supporting policyholders' liabilities and income expected to be earned or foregone on reinvestment or financing of mismatched cash flows. In the absence of robust market information, long-term yields are determined using recent asset returns, current market expectations and relevant regulatory guidelines. Other information, such as macro-economic data and projections, is considered where available.

● **Policy maintenance expense and inflation**

Amounts are included in policyholders' liabilities to provide for the future costs of administering policies in force. The expense base is determined from a review of current, recent and expected Group expense levels and allowance is made for future expense inflation.

● **Tax**

It has been assumed that current tax legislation and rates for long-term insurance companies continue unaltered.

The above analyses are based on a change in assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated.

#### 4.2 Financial risk

The Group is exposed to financial risk through its financial assets, financial liabilities (investment contracts and borrowings), reinsurance assets and insurance liabilities. In particular, the key financial risk is that the proceeds from its financial assets are not sufficient to fund the obligations arising from its insurance and investment contracts. The components of this financial risk are interest rate risk, equity price risk, foreign currency risk, liquidity risk and credit risk. These risks arise from open positions in interest rate, currency and equity products, all of which are exposed to general and specific market movements.

Expressed in Trinidad and Tobago Dollars

(Continued)

**4. Management of Insurance and Financial Risk (continued)**

**4.2 Financial risk (continued)**

Risk management is carried out by Executive Investment Committees and Actuarial departments of operating units under policies approved by the Group's Board of Directors. The Group identifies, evaluates and hedges financial risks in close co-operation with the Group's operating units. The Board provides principles for overall risk management as well as policies covering specific areas such as foreign exchange risk, interest rate risk, credit risk and investment of excess liquidity.

**4.2.1 Market risk**

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk - currency risk, interest rate risk and other price risk, each of which is considered below.

**(a) Currency risk**

The Group takes on exposure to effects of fluctuations in the prevailing foreign currency rates on its financial position and cash flows. The Group's main operations are in the Caribbean and in the Netherlands. The main exposure to risks are in respect to the US dollar, Antillean guilder, Jamaican dollar, Euro and the British pound. The Group's strategy for dealing with foreign exchange risk is to offset, as far as possible, foreign currency liabilities with assets denominated in the same currency.

Each subsidiary has an Executive Investment Committee, which has oversight for the management of currency risk. The Trinidad and Tobago insurance subsidiaries' exposure to currency risk is also mitigated by the requirements of the Insurance Act 1980, which does not allow more than 20% of the assets supporting policyholder liabilities to be held in currencies other than the currency of the liability.

The tables below summarises the Group's exposure to foreign currency exchange rate risk as at 31 December. The Group's assets and liabilities at carrying amounts are included in the table categorised by currency positions expressed in TT\$ equivalents

##### (b) Interest rate risk

The Group is exposed to various risks associated with the effects of fluctuations in the prevailing levels of market interest rates on its financial position and cash flows. The major element of interest rate risk within the Group is the risk that the interest earned on the Group's investments is insufficient to meet the interest rates credited or guaranteed to policyholders. This applies to traditional life insurance policies and the deposit administration plans.

Exposure is managed largely by the use of natural hedges that arise by matching interest-sensitive assets with liabilities of a similar nature. The Group also mitigates the effect of interest rate risk of the investment portfolio through the functioning of an Executive Investment Committee and the pricing of products by the actuarial function. The investment portfolio return is continually monitored by the Investment Committees. The results of these reviews inform the pricing of products and interest rates to be credited to the respective policies and plans.

The sensitivity analysis for interest rate risk illustrates how changes in the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates at the reporting date. For the sensitivity analysis, a 1% movement in interest rates was used for 2018 for the Trinidadian market (2017 - 1%), a 2% movement was used for 2018 for the Jamaican market (2017 - 2%) and a 1% movement for 2018 was used for the Dutch Caribbean (2017 - 1%).

#### 4. Management of Insurance and Financial Risk (continued)

##### 4.2 Financial risk (continued)

##### 4.2.1 Market risk (continued)

##### (b) Interest rate risk (continued)

The following table shows the estimated effect of an increase or decrease in the above rates on the profit or loss and fair value reserve.

|                            | Effect on<br>fair value<br>reserve<br>2018<br>\$'000 | Effect on<br>consolidated income<br>2018<br>\$'000 | Effect on<br>consolidated income<br>2017<br>\$'000 |
|----------------------------|------------------------------------------------------|----------------------------------------------------|----------------------------------------------------|
| Increase in interest rates | (194,044)                                            | (79,182)                                           | (231,339)                                          |
| Decrease in interest rates | 194,044                                              | 79,182                                             | 231,339                                            |

##### (c) Other price risk

Price risk is the risk that the value of a financial instrument will fluctuate as a result of changes in market prices, whether those changes are caused by factors specific to the individual instrument or its issuer or factors affecting all instruments traded in the market. The Group is exposed to equity securities price risk because of investments held by the Group and classified on the consolidated statement of financial position as fair value through profit or loss. The Group manages its price risk by limiting the amount of its investments in equities and by monitoring movements in equity prices.

The sensitivity analysis for equity price risk illustrates how changes in the fair value of equity securities will fluctuate because of changes in market prices at the reporting date. For the sensitivity analysis, a 2% movement in prices of local equities was used for 2018 for the Trinidadian market (2017 - 4%), a 10% movement in prices of local equities was used for 2018 for the Jamaican market (2017 - 10%) and a 1% movement for 2018 was used for Dutch Caribbean (2017 - 1%). The estimated effect of an increase/decrease in the above rates would result in an increase/decrease in the consolidated statement of income and equity of \$124,235,000 for 2018 (2017: \$136,537,000).

##### 4.2.2 Liquidity risk

Liquidity risk is the risk that cash may not be available to pay obligations when due, at a reasonable cost. Prudent liquidity risk management implies maintaining sufficient cash and marketable securities, the availability of funding through an adequate amount of committed credit facilities, and the ability to close out market positions.

Certain of the Group's contracts have features that allow them to be terminated at short notice creating a potential liquidity exposure. The Group monitors liquidity on a regular basis. An internally constituted Executive Investment Committee set limits on the minimum proportion of maturing funds available to meet such calls and on the minimum level of borrowing facilities that should be in place to cover claims.

There are no individual contracts or policyholders who have the potential to influence the withdrawal of a significant amount of liabilities.

The following tables analyse the insurance and financial liabilities of the Group into relevant maturity groupings based on the remaining period to the contractual or expected maturity date. Financial liabilities are at contractual undiscounted cash flows, and insurance contracts and investment contracts are at expected undiscounted cash flows.

**4.2.3 Credit risk**

Credit risk is defined as the potential for loss that can occur as a result of an individual, counterparty or issuer being unable or unwilling to honour its contractual obligations to the Group. Each subsidiary in the various jurisdictions has an Executive Investment Committee (EIC) that sets credit limits and monitors exposure by constraining the magnitude and tenor of the exposure to counterparties and issuers. Some of the credit risk mitigation techniques include, where appropriate, the right to require initial collateral or margin, the right to terminate transactions, and the right to obtain collateral (including guarantees) should unfavourable events occur.

Collateral held as security for mortgage loans and other loans includes physical or tangible residential and commercial edifices as well as legal rights to insurance portfolio and other assets of the respective borrowers. The EIC initiates regular portfolio reviews, monitors counterparty creditworthiness and evaluates potential transaction risks with a view towards early problem identification and protection against unacceptable credit-related losses.

**(a) Assets bearing credit risk**

The Group actively monitors the financial status of its reinsurers both by reference to publicly available information and the Financial Strength Ratings of A.M. Best. All of the Group's reinsurers are rated superior by A.M. Best. A rating of superior is assigned to reinsurance companies that have, in the opinion of A.M. Best, a superior ability to meet their ongoing obligations to the primary insurer.

Below is an analysis of assets bearing credit risk.

## GUARDIAN HOLDINGS LIMITED

### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2018

Expressed in Trinidad and Tobago Dollars

(Continued)

#### **4. Management of Insurance and Financial Risk (continued)**

##### **4.2 Financial risk (continued)**

##### **4.2.3 Credit risk (continued)**

##### **(b) Credit quality of reinsurance and financial assets**

The credit quality of financial assets can be assessed by reference to external credit ratings, if available, or to a rating assigned by the investment manager using an approach consistent with that used by Standard and Poor's.

##### **AAA**

An obligation rated 'AAA' has the highest rating assigned by Standard & Poor's. The obligor's capacity to meet its financial commitment on the obligation is extremely strong.

##### **AA**

An obligation rated 'AA' differs from the highest-rated obligations only to a small degree. The obligor's capacity to meet its financial commitment is very strong.

##### **A**

An obligation rated 'A' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor's capacity to meet its financial commitment on the obligation is still strong.

##### **BBB**

An obligation rated 'BBB' exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

##### **Below BBB**

Obligations rated 'Below BBB' are regarded as having significant speculative characteristics. While such obligations will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposures to adverse conditions.

##### **Not Rated**

This indicates that there is insufficient information on which to base a rating. These balances are current and are monitored regularly for impairment. This classification mainly includes obligations due from individuals and short-term securities.

**(e) Loss allowance**

The following tables show reconciliations from the opening to the closing balance of the loss allowance by class of financial asset. Reconciling items include the following:

- ▶ New assets originated or purchased, which reflect the allowance related to assets newly recognized during the period.
- ▶ Assets derecognised, which reflect the allowance related to assets derecognized during the period without a credit loss being incurred, including those assets that were derecognized following a modification of terms.
- ▶ Net transfer to/(from) 12-month ECL and lifetime ECL, which are presumed to occur before any corresponding remeasurement of the allowance.
- ▶ Remeasurements, which comprise the impact of changes in model inputs or assumptions, including changes in forward-looking macroeconomic conditions; changes in the measurement following a transfer between 12-month ECL and lifetime ECL; and unwinding of the time value discount due to the passage of time.

Comparative amounts (2017) represent impairment provisions for credit losses and reflect measurement basis under IAS 39.

**Cash and cash equivalents**

Impairment on cash and cash equivalents measured at amortised cost has been measured on the 12-month expected loss basis and reflects the short maturities of the exposures. The Group uses a similar approach for the assessment of expected credit losses for cash and cash equivalents to those used for debt securities.

On initial application of IFRS 9, the Group recognised an impairment allowance as at 1 January 2018 in the amount of \$20,196,000. The amount of the allowance decreased by \$8,422,000 during 2018.

### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2018

Expressed in Trinidad and Tobago Dollars

(Continued)

#### 4. Management of Insurance and Financial Risk (continued)

##### 4.2 Financial risk (continued)

##### 4.2.3 Credit risk (continued)

##### (f) Concentrations of risks of reinsurance and financial assets with credit risk exposure

Concentrations arise when a number of counterparties are engaged in similar business activities, or activities in the same geographical region, or have economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic, political or other conditions. Concentrations indicate the relative sensitivity of the Group's performance to developments affecting a particular industry.

The following table breaks down the Group's main credit risk exposure as categorised by the industry sectors of its counterparties.

|                            | 2018<br>\$'000    | 2017<br>\$'000    |

##### 4.2.4 Capital management

The Group's capital includes share capital, reserves and retained earnings.

The Group's objectives when managing capital are:

- To comply with the capital requirements required by the regulators of the markets where the Group operates;
- To safeguard the Group's ability to continue as a going concern so that it can continue to provide returns for shareholders and benefits for other stakeholders; and
- To provide an adequate return to shareholders by pricing insurance and investment contracts commensurately with the level of risk.

#### 4. Management of Insurance and Financial Risk (continued)

##### 4.2 Financial risk (continued)

##### 4.2.4 Capital management (continued)

In each country in which the Group operates, the local insurance regulator indicates the required minimum amount and type of capital that must be held by each of the subsidiaries in addition to their insurance liabilities. The Group is also subject to insurance solvency regulations in all the territories in which it issues insurance and investment contracts. The minimum required capital must be maintained at all times throughout the year. The Group monitors these requirements throughout the year to ensure compliance.

No changes were made in the objectives, policies or processes for managing capital during the year ended 31 December 2018.

The table below summarises the minimum required capital across the main territories in the Group. The Group has complied with these minimum capital requirements. These figures are an aggregate number, being the sum of the statutory capital and surplus for each insurance subsidiary in each country subject to local regulatory requirements (current or prospective), which may differ from jurisdiction to jurisdiction.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2018

Expressed in Trinidad and Tobago Dollars

(Continued)

**5. Property, plant and equipment (continued)**

Valuations were made on the basis of open market value by external independent appraisers, who are accredited in the territory that they serve. Valuations are based on active market prices, adjusted for any difference in the nature, location or condition of the specific property.

Depreciation expense of \$48,607,000 (2017 - \$45,995,000) has been charged in operating expenses.

If freehold and leasehold properties were stated on a historical cost basis, the amounts would be as follows:

|                          | <b>2018</b>      | <b>2017</b>      |
|--------------------------|------------------|------------------|
|                          | <b>\$'000</b>    | <b>\$'000</b>    |
| Cost                     | 437,027          | 422,407          |
| Accumulated depreciation | <u>(184,652)</u> | <u>(168,734)</u> |
| Net book value           | <u>252,375</u>   | <u>253,673</u>   |

**6. Investment properties**

The Group has both commercial and residential investment properties in the following territories: Jamaica, Barbados, Trinidad and Tobago, Grenada and Martinique.

Valuations are conducted by external valuers. All valuers are accredited in the territory that they serve, specializing in the valuation of commercial, residential and a mixed use properties.

Residential properties are mainly revalued using the comparable sales approach, which estimates the fair value based on sale prices of properties of similar nature or in similar locations with price adjustments being made for any notable differences between the sample and subject properties.

Commercial properties are primarily valued using the income and sales comparison approach, which involves determining the value of the properties by applying an appropriate valuation model to convert the expected future cash flows into present values. Discount rates applied to the model throughout the Group range from 6% to 7% (2017: 5% to 9%) as deemed most appropriate by the valuers in the respective territories.

No investment property in the Group is subject to any liens or mortgages and the Group has no curtailments with regard to the transfer, resale or other use of its investment properties. The Group is not under any contractual obligation with regard to significant development, enhancement, repair or maintenance of any investment properties.

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2018

Expressed in Trinidad and Tobago Dollars

(Continued)

### 7. Intangible assets (continued)

#### Goodwill

Goodwill is assigned to the Group's cash-generating units on acquisition. In accordance with IFRS 3, all assets that gave rise to goodwill were reviewed for impairment at year end using the value-in-use method. In each case, the cash flow projections were based on financial budgets for a three-year period, approved by senior management, with a growth assumption applied for later years.

A summary of the goodwill for each cash-generating unit is presented below:

|                                                | 2018<br>\$'000 | 2017<br>\$'000 |
|------------------------------------------------|----------------|----------------|
| Guardian General Insurance Limited             | 97,459         | 97,459         |
| Guardian Insurance Limited                     | 153,977        | 153,977        |
| Guardian General Insurance Jamaica Limited     | 6,615          | 6,599          |
| Thoma Exploitatie B.V.                         | 78,120         | 91,028         |
| Royal & Sun Alliance Insurance (Antilles) N.V. | 26,849         | 26,780         |
| Kruit en Venema Assuradeuren B.V.              | 18,540         | 18,297         |
| Fatum Brokers Holding B.V.                     | 58,278         | 58,127         |
|                                                | <u>439,838</u> | <u>452,267</u> |

The key assumptions used for value-in-use calculations are as follows:

| Cash generating unit                                                | Discount Rate |              | Growth Rate |       |
|---------------------------------------------------------------------|---------------|--------------|-------------|-------|
|                                                                     | 2018          | 2017         | 2018        | 2017  |
| Guardian General Insurance Limited                                  | 9.4%          | 9.0%         | 5.0%        | 5.0%  |
| Guardian Insurance Limited (Trinidad and Tobago based subsidiaries) | 9.7%          | 9.1%         | 5.0%        | 5.0%  |
| Guardian Insurance Limited (Jamaica based subsidiary)               | 9.7%          | 9.1%         | 5.0%        | 5.0%  |
| Guardian General Insurance Jamaica Limited                          | 9.4%          | 9.0%         | 5.0%        | 5.0%  |
| Thoma Exploitatie B.V.                                              | 12.5%         | 11.1%        | 2.0%        | 1.0%  |
| Royal & Sun Alliance Insurance (Antilles) N.V.                      | 9.7%          | 9.5%         | 1.8%        | 2.0%  |
| Kruit en Venema Assuradeuren B.V.                                   | 12.5%         | 11.1%        | 2.0%        | -1.7% |
| Fatum Brokers Holding B.V.                                          | 10.3% - 10.9% | 9.9% - 10.3% | 1.8%        | 2.0%  |

**Discount rates:** Discount rates represent the current market assessment of the risks specific to each cash-generating unit, taking into consideration the time value of money and individual risks of the underlying assets that have not been incorporated in the cash flow estimates. The discount rate calculation is based on the specific circumstances of the Group and its operating segments and is derived from its weighted average cost of capital (WACC).

**Growth rates:** Rates are based on published industry research and management's expected performance of each cash-generating unit.

Based on the results of the above review, no impairment expense was required for goodwill.

| Properties for development and sale (Note 6)   | <u>104,115</u> | <u>103,475</u> |

Properties for development and sale comprise the Group's investment in one component of the Pointe Simon urban re-development project in Fort de France, Martinique.

The French government provides incentives for qualifying property developments in France's overseas territories. During 2013 and 2014, the Group availed itself of the programme and received funds based upon agreed valuations of twenty-five residential units in 2014 (2013 – three units). The sums received were recorded as other income.

While legal title has been transferred to third parties, the arrangement contemplates that at the expiration of a six-year period (2019 and 2020), the units will return to the Group's legal ownership, and will be available for disposal to third parties at the prevailing market price. Accordingly, the Group has not derecognised these assets, and continues to account for these units within Properties for development and sale. During 2017, properties fair valued at \$88,334,000 were transferred to investment properties.

During 2014, the Group sold the hotel property to a Martinique incorporated company known as Sas Compagnie Hoteliere de la Pointe Simon (CHPS). As part of the sale negotiation, the Group acquired a 24% interest in CHPS for nominal consideration.

**11. Properties for development and sale (continued)**

The Group financed the sale to CHPS and at 31 December 2018 the outstanding balance, included in loans and other receivables, was €14.4 million (2017: €15 million). The loan has three components, with terms as follows:

1. €11.1 million repayable in 20 biannual instalments of €0.4 million with a bullet at maturity of €6.2 million. Interest is fixed at 3.3%.
2. €0.6 million repayable over 3 years at 3.3% per annum.
3. €6.4 million to be repaid upon receipt of certain subsidies and tax refunds from the French government.

**12. Pension plan assets/liabilities**

The following information explains the quantification of the assets and liabilities recognised in the consolidated statement of financial position and the net income for the year in accordance with the provisions of IAS 19.

|                                                                          | Pension plan asset |               | Pension plan liability |                  | Net pension plan asset/(liability) |                 |

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2018

Expressed in Trinidad and Tobago Dollars

(Continued)

### 12. Pension plan assets/liabilities (continued)

The defined benefit plan assets as at 31 December 2018 include the Group's financial instruments of \$8,809,000 (2017: \$7,601,000). Included in the plan's assets is a property with a fair value of \$19,045,000 (2017: \$18,400,000), which is not occupied by the Group.

Contributions from the defined contribution plan are invested in a deposit administration contract. The deposit administration contract is part of a general fund, which is managed by a Group subsidiary.

The Group's expected contributions to its defined benefit pension plans for the year ending 31 December 2019 are \$30,254,000.

The duration of the defined benefit plans obligation at the end of the reporting period is 13 to 24 years (2017: 14 to 24 years).

A quantitative sensitivity analysis for significant assumptions as at 31 December 2018 is shown below:

|                                                      | Impact on the net defined benefit obligation |          |
|------------------------------------------------------|----------------------------------------------|----------|
|                                                      | Increase                                     | Decrease |
| 1% increase/decrease in discount rate                | (108,491)                                    | 143,683  |
| 1% increase/decrease in future salary increases      | 25,865                                       | (26,106) |
| 1% increase in future pension increases              | 45,653                                       | (42,575) |
| Life expectancy increase/decrease by 1 year - male   | 14,702                                       | (14,217) |
| Life expectancy increase/decrease by 1 year - female | 3,106                                        | (15,130) |

The sensitivity analysis above has been determined based on a method that extrapolates the impact on the net defined benefit obligation as a result of reasonable changes in key assumptions occurring at the end of the reporting period.

### 13. Deferred taxation

The following amounts are shown in the consolidated statement of financial position:

|                                             | 2018<br>\$'000   | 2017<br>\$'000   |
|---------------------------------------------|------------------|------------------|
| Deferred tax assets:                        |                  |                  |
| - To be recovered after more than 12 months | 46,262           | 23,706           |
| - To be recovered within 12 months          | 15,049           | 16,424           |
|                                             | <u>61,311</u>    | <u>40,130</u>    |
| Deferred tax liabilities:                   |                  |                  |
| - Crystallizing after more than 12 months   | (287,719)        | (254,508)        |
| - Crystallizing within 12 months            | (27,011)         | (18,844)         |
|                                             | <u>(314,730)</u> | <u>(273,352)</u> |
| Net deferred tax liability                  | <u>(253,419)</u> | <u>(233,222)</u> |

Deferred income tax assets are recognised for tax losses carried forward to the extent that the realisation of the related tax benefit through future taxable profits is probable.

There are tax losses relating to subsidiaries that are available for set-off against future chargeable profits of \$228,827,000 (2017 - \$143,336,000). These tax losses expire over varying periods. No deferred tax asset has been recognised on tax losses carried forward of \$68,196,000 (2017 - \$62,728,000), due to the uncertain timing of their recovery. Some of these losses have not yet been agreed with the respective tax authorities.

A statutory reserve is maintained by general insurance companies in Trinidad and Tobago. This is in accordance with the provisions of Section 171 of the Insurance Act 1980 of Trinidad and Tobago, where companies are required to appropriate towards statutory reserve at least 25% of the prior year's profit until the excess of assets over liabilities equals or exceeds the reserve in respect of its unearned premiums. The general insurance companies in Trinidad and Tobago comply with this requirement.

The Financial Institutions Act 2008 requires a financial institution in Trinidad and Tobago to transfer annually a minimum of 10% of its profit after taxation to a reserve fund until the balance on this reserve is not less than the paid-up capital of the institution. The trust services company in Trinidad and Tobago complies with this requirement.

19. Non-controlling interests in subsidiary

|                                         | 2018<br>\$'000 | 2017<br>\$'000 |
|-----------------------------------------|----------------|----------------|
| Non-controlling interests in subsidiary | <u>22,573</u>  | <u>23,071</u>  |

At the end of the year, the non-controlling interest balance represents a 40.6% shareholding in Guardian General Insurance (OECS) Limited.

**20.2 Claims development tables - property and casualty insurance contracts**

The development of insurance liabilities provides a measure of the Group's ability to estimate the ultimate value of claims. Claims development tables are disclosed on an accident year basis (where the reference is to the actual date of the event that caused the claim), with the exception of international property and casualty claims, which is disclosed by underwriting year account.

The top half of each table below illustrates how the Group's estimate of total claims outstanding for each accident year/underwriting year has changed at successive year-ends. The bottom half of the table reconciles the cumulative claims to the amount appearing on the consolidated statement of financial position as per summary below.

|                                 | Total<br>\$'000  |
|---------------------------------|------------------|
| Insurance claims - gross        |                  |
| - By accident year              | 1,453,860        |
| - By underwriting year          | <u>162,826</u>   |
| Total liability (Note 20.1 (e)) | <u>1,616,686</u> |
| Insurance claims - net          |                  |
| - By accident year              | 553,699          |
| - By underwriting year          | <u>64,443</u>    |
| Total liability (Note 20.1 (e)) | <u>618,142</u>   |

| Total current portion of borrowings (Note 21.1)     | 609,043          | 276,187          |
| Interest payable                                    | 31,800           | 33,509           |
|                                                     | 640,843          | 309,696          |
| <b>Total</b>                                        | <b>2,327,404</b> | <b>2,347,739</b> |

The fair value of medium-term borrowings amounted to \$2,327,633,000 (2017: \$2,235,929,000). These fair value of medium-term borrowings are determined by applying a discounted cash flow model for the remaining term to maturity using a current yield curve for a similar debt instrument. For short-term debt, the carrying amounts approximate their fair value.

The Group has not had any defaults of principal, interest or other breaches with respect to their borrowings during the year (2017 - Nil).

Details of major total current and non-current loans are as follows:

**Parent company**

**Facility 1 - \$1 billion**

This is a fixed rate 12-year bond ending in December 2023 and comprises two series. Interest is charged at 7.975% per annum and is paid semi-annually. Series 1 principal repayments commenced on 27 July 2011 by 7 equal half-yearly installments of \$3,375,000, 16 equal half-yearly installments of \$18,750,000 and a final balloon installment of \$576,375,000. Series 2 principal repayments commenced 27 January 2012 by 6 equal half-yearly installments of \$375,000, 16 equal half-yearly installments of \$2,083,333 and a final balloon installment of \$64,416,667.

**Facility 2 - \$517 million**

This is a fixed rate 5-year bond ending in December 2019. Interest is charged at 4.25% per annum and is payable in 10 half-yearly installments, which commenced June 2015. The principal is to be repaid at maturity.

**Facility 3 - \$450 million**

This is a secured 5-year fixed rate loan ending in December 2022. Interest is charged at 5.92% per annum and is paid semi-annually. The principal is payable at maturity.

Facilities 1, 2 and 3 are secured by a debenture creating a charge over the fixed and floating assets of Guardian Holdings Limited.

**Facility 4 - \$400 million**

This is a 2-year fixed rate loan ending in December 2020. The loan is drawn in tranches with \$200 million drawn in December 2018. Interest is charged at 4.47% per annum and is paid semi-annually. The principal is payable at maturity.

**21. Financial liabilities (continued)**

**21.1 Borrowings (continued)**

**Subsidiaries**

**Loan 1 - US\$50 million**

This is an unsecured fixed rate 5-year loan ending in June 2021. Interest is fixed at 4.5% and is payable semi-annually. The principal is to be repaid at maturity.

**Loan 2 - J\$1.8 billion**

This is an unsecured fixed rate 7-year loan ending in October 2019. Interest is charged at 8.75% and is payable quarterly in arrears. The principal is repayable by 21 equal quarterly payments of J\$79,600,000 and a final payment of J\$80,400,000, which commenced 31 July 2014. This loan is guaranteed by Guardian Holdings Limited.

**22. Investment contract liabilities**

**2018**  
**\$'000**

**2017**  
**\$'000**

The movements in the liabilities arising from investment contracts are summarised below:

|                                                                       |                  |                  |
|-----------------------------------------------------------------------|------------------|------------------|
| Balance at beginning of year                                          | 1,989,472        | 1,811,761        |
| Premiums received                                                     | 221,861          | 286,662          |
| Fees deducted from account balances                                   | (13,303)         | (17,453)         |
| Account balances paid on surrender and other terminations in the year | (262,956)        | (183,496)        |
| Interest credited through income                                      | 65,304           | 67,652           |
| Other movements                                                       | 4,572            | 2,979            |
| Exchange rate adjustments                                             | (15,577)         | 21,367           |
| Balance at end of year                                                | <u>1,989,373</u> | <u>1,989,472</u> |

Investment contract liabilities carry floating rates of interest and therefore the carrying amounts approximate their fair values.

**24. Post-retirement medical benefit obligations**

**2018**  
**\$'000**

**2017**  
**\$'000**

The amounts recognised in the consolidated statement of financial position are as follows:

|                              |         |         |
|------------------------------|---------|---------|
| Present value of obligations | 121,245 | 105,804 |
|------------------------------|---------|---------|

The amount in the consolidated statement of income is made up as follows:

|                                |       |       |
|--------------------------------|-------|-------|
| Interest cost                  | 5,075 | 4,517 |
| Current service cost           | 2,838 | 2,264 |
| Expense for the year (Note 36) | 7,913 | 6,781 |

The movement in the liability is as follows:

|                                                |         |         |
|------------------------------------------------|---------|---------|
| Balance at beginning of year                   | 105,804 | 89,646  |
| Exchange rate adjustments                      | 194     | 163     |
| Remeasurement of obligation (actuarial losses) | 10,634  | 12,025  |
| Employer contributions                         | (3,300) | (2,811) |
| Expense as per above                           | 7,913   | 6,781   |
| Balance at end of year                         | 121,245 | 105,804 |

The principal actuarial assumptions used were as follows:

|                             |                      |                      |
|-----------------------------|----------------------|----------------------|
| Discount rate               | 4.2% - 7%            | 3.6% - 8%            |
| Healthcare cost escalation  | 2% - 6%              | 2% - 8%              |
| Retiree premium escalation: |                      |                      |
| Existing retirees           | 0% - 5%              | 0% - 5%              |
| Future retirees             | 0% - 5%              | 0% - 5%              |
| Pre-retirement mortality    | GBM/GBV<br>2005-2010 | GBM/GBV<br>2000-2005 |
| Post-retirement mortality   | GAM94                | GAM94                |

A quantitative sensitivity analysis for significant assumptions as at 31 December 2018 is shown below:

|                                                 | Impact on the obligation |                    |
|-------------------------------------------------|--------------------------|--------------------|
|                                                 | Increase<br>\$'000       | Decrease<br>\$'000 |
| 1% increase/decrease in discount rate           | (17,177)                 | 22,055             |
| 1% increase/decrease in medical cost trend rate | 21,846                   | (17,296)           |

Expected contributions to post-employment benefit plans for the year ending 31 December 2019 are \$3,339,000.

| Final dividend for 2017 - 45¢ per share (2016 - 45¢ per share)   | 104,352                      | 104,355                      |
| Interim dividend for 2018 - 23¢ per share (2017 - 22¢ per share) | <u>53,329</u>                | <u>51,018</u>                |
|                                                                  | <u><b>157,681</b></u>        | <u><b>155,373</b></u>        |

On 28 February 2019, the Board of Directors declared a final dividend of 48 cents per share (2017 - 45 cents), a total dividend to be paid of \$111 million (2017: \$104 million). These consolidated financial statements do not reflect the final dividend which will be accounted for as an appropriation of retained earnings in the year ending 31 December 2019.

The Group does not regard that any reasonable change in the valuation assumptions of level 3 assets and liabilities will have any significant impact on the consolidated financial statements.

The following table provides the fair value measurement of the Group's assets and liabilities that are not measured at fair value in the consolidated statement of financial position but whose fair values are disclosed in the notes to the accounts.

The total revenue information above consists of net underwriting revenue, investment income, net realised gains/losses, net fair value gains/losses, fee income, other income and commission income from brokerage activities. Revenue is based on locations of the customer and there are no transactions with a single customer that amount to more than 10% of total revenue.

Non-current assets for this purpose consist of property, plant and equipment, investment properties, intangible assets, investment in associated companies and properties for development and sale.

### 44. Contingent liabilities

#### Legal proceedings

Group companies are defendants in various legal actions. In the opinion of the Directors, after taking appropriate legal advice, the outcome of such actions will not give rise to any significant loss.

### 45. Commitments

#### Capital commitments

The Group has no material capital commitments for the year ended 31 December 2018 (2017: nil).

| Operating lease commitments – where a Group company is the lessee           | 2018           | 2017           |
|-----------------------------------------------------------------------------|----------------|----------------|
| The aggregate minimum lease payments under operating leases are as follows: | \$'000         | \$'000         |
| Not later than one year                                                     | 41,101         | 42,126         |
| Later than one year and no later than five years                            | 92,856         | 112,099        |
| Over five years                                                             | 8,857          | 12,586         |
|                                                                             | <u>142,814</u> | <u>166,811</u> |

Rental expense under these leases amounted to \$40,165,000 for the year ended 31 December 2018 (2017 - \$37,039,000).

There was no provision for doubtful debts at the reporting date and no bad debt expense in the year (2017: Nil).

Financial assets of key associates comprise multiple corporate bonds plus interest receivable and preference shares issued by RGM to the Group. The preference shares held by the Group are cumulative, non-convertible and redeemable. The corporate bonds carry fixed interest rates and principal and interest are payable semi-annually. All bonds are secured by mortgages on various properties.

Financial assets of other related parties comprise debt, equity and other investments issued by entities controlled by related parties, in the ordinary course of business.

Loans to key management of the Group are secured and settlement occurs in cash. The details of the loan advanced to CHPS are disclosed in Note 11.

**49. Impact of initial application of IFRS 9**

The Group adopted IFRS 9 with a date of initial application of 1 January 2018, which resulted in changes to the Group's accounting policies for recognition, classification and measurement of financial assets and impairment of financial assets.

As permitted by the transitional provisions of IFRS 9, the Group did not restate comparative amounts. The cumulative retrospective impact of applying the new requirements has been reflected in the Group's opening statement of financial position as at 1 January 2018, as shown below. Also, for notes disclosures, the consequential amendments to IFRS 7 Financial instruments: Disclosures have only been applied to the current period. The comparative period notes disclosures repeat those disclosures made in the prior year.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2018

Expressed in Trinidad and Tobago Dollars

(Continued)

**50. IFRS 9 transition disclosures (continued)**

**(i) Classification and measurement of financial assets on the date of initial application of IFRS 9 (continued)**

The Group's accounting policies on classification of financial instruments under IFRS 9 are set out in Note 2.9. The application of these policies resulted in the reclassifications set out in the table above and explained below.

- ▶ Certain debt securities are held in a separate portfolio for long term yield. These securities may be sold, but such sales are not expected to be more infrequent. The Group considers that these securities are held within a business model whose objective is to hold assets to collect the contractual cash flows. These assets are classified as measured at amortised cost under IFRS 9.
- ▶ Certain debt securities are held in separate portfolios to meet everyday liquidity needs. The return on these portfolios consist of collecting contractual payments as well as gains and losses from the sale of financial assets. The investment strategy often results in sales activity that is significant in value. The Group considers that under IFRS 9 these securities are held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets.
- ▶ Certain securities are held in separate portfolios and are managed with an objective of realizing cash flows through sale. The Group primarily focuses on fair value information and uses that information to assess the securities performance and to make decisions. In addition, certain asset backed securities have contractual cash flows that are not solely payments of principal and interest. These assets are therefore measured at fair value through profit or loss under IFRS 9.

For financial assets that have been reclassified from the fair value through profit or loss category to the amortised cost and fair value through other comprehensive income categories, the following table shows their fair value as at 31 December 2018, interest revenue and the fair value gain or loss that would have been recognised if these financial assets had not been reclassified as part of the transition to IFRS 9.

|                                                                                                                                                                | <b>Financial assets<br/>reclassified from<br/>FVPL to FVOCI</b> |                         |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------|-------------------------|
|                                                                                                                                                                | <b>AC<br/>\$'000</b>                                            | <b>FVOCI<br/>\$'000</b> |
| Fair value of financial assets reclassified, as at 31 December 2018                                                                                            | <u>927,686</u>                                                  | <u>2,287,867</u>        |
